MACK LEE CASE TO A CLOSE

TAKING OF TESTIMONY CLOSSES
AT 2:30 TODAY.

SEVEN LAWYERS TO SPEAK

Final Finish to Come This Afternoon
and Tonight When Attorneys
Have the Floor.

The case of Mack Lee, charged with the murder of Marshal Zeke Putman at Allen on the night of February 16th, this year, will be closed when the attorneys have delivered their argument to the jury. The taking of testimony closed at 2:30, and at 3:30 the argument was begun.

The forenoon today was consumed in taking evidence to ascertain whether or not Mack Lee was in Centrahoma making a land deal on the 23rd day of February, as he had testified. The register of the Stewart hotel at Oklahoma City was introduced by the hotel clerk and showed that Lee had registered at Oklahoma City on the evening of the 23rd and had left on the following day. The point was raised by reason of a contract which was introduced by the defense and which was supposed to have been executed at Centrahoma, controverting certain evidence of John Scribner. This point was the bone of contention from early this morning until the taking of testimony was closed.

Several character witnesses have been introduced, many of whom discredited the character of Lee's witnesses. Character witnesses for Lee give him a good name and vouch for his standing in the community where he lives.

This has been a long, hard fought case, and one which the public has watched with much interest. The people will await the verdict of the jury with the same eagerness which has characterized their attention from the beginning of the trial.

RESTRAINING ORDERS GRANTED.

Federal Judge at McAlester Acts in
Railroads' Tax Suits Against
State of Oklahoma.

McAlester, Ok., June 12.—The Missouri, Kansas and Texas, the Gulf, Colorado and Santa Fe, the Atchison, Topeka and Santa Fe, the Fort Smith and Western and the Midland Valley railroad companies today filed thirty suits in the Federal court for the Eastern District of Oklahoma against county treasurers and sheriffs in nearly as many counties, seeking to restrain them from collecting taxes claimed to be illegally assessed against the railway companies. Unequal taxation is the chief ground alleged, and the constitutionality of the acts creating the Board of Assessors and the Board of Equalization is questioned. Judge Ralph E. Campbell this evening granted temporary restraining orders in all the cases.

WIFE SLAYER IS KILLED BY POSSE

CLAREMORE MAN PAYS QUICK
PENALTY FOR MURDER.

Kills His Wife and Meets Death
Himself Within Thirty
Minutes.

Claremore, Okla., June 12.—Henry Mosley, night watchman of the police force at Claremore, tonight at 7:30 killed his wife and was himself killed a half hour later by a posse of officers whom he resisted on the highway in attempting to escape. Mrs. Mosley was shot twice, the first ball entering her heart and killing her instantly. The second entered the stomach.

Mosley, goaded by family troubles that had led some time ago to a separation, came home early this evening and finding his wife away, went to town and brought her home. The shooting occurred in the front yard. Sheriff Stephens and two deputies overtook Mosley a half mile north of town. Mosley turned upon them and opened fire which the posse returned. Mosley was killed instantly by one of the posse.

Mosley was 40 years old and had been here for 20 years. There are three children in the family, the eldest 16 years old.

IN MATTER OF LICENSE.

Some Misunderstanding Which Should
Be Corrected.

Since the case of Mr. Lingenfelter was discussed in the newspapers several days ago a general misunderstanding among the farmers has been created. Several of them, in fact, have gone so far as to consult the city clerk as to whether or not they could sell their products on the streets of Ada without paying a license. The ordinance which provides that a license shall be paid by peddlers or hawkers applies only to persons who purchase wares and peddle them for a profit but not to a man who raises his products and disposes of them on the streets. A farmer, or any other person for that matter, can dispose of anything he produces to suit himself and there is no revenue charge attached, but a man who buys products from other producers and peddles them for profit, thereby making it a business is subject to the license.

To say that the producer cannot dispose of his products without paying for the privilege would be extremely unjust and such is not the intention of the ordinance, neither does such custom prevail.

Court Action Delayed.

Guthrie, Ok., June 12.—No action will be taken in the courts against the state board of affairs as contemplated by Superintendent Cameron of the board of normal school regents, until after the latter board has a meeting now called for June 15. At that time the question of testing the authority of the State board of affairs will be determined. The controversy grows out of the board's refusal to approve an estimate for about \$15,000 alleged to be due contractors working on the Weatherford school buildings. Members of the board of affairs say they do not know that a contract for the work has been made.

A Beautiful Thought.

The following sentiment is from the pen of Bob Taylor: "I would rather fill my purse with money and keep its gates ajar to my happy girls while yet they linger under my roof than to clutch it with a miser's hand until all the harp-strings of youth are broken and its music forever fled. I would rather spend my last nickel for a bag of stripped marbles to gladden the hearts of my barefooted boys than to deny them their childish pleasures, and leave them a bag of gold to quarrel over when I am dead. I abhor the pitiless hawk that circles in the air only to swoop down and strangle the song of the linnet or bury its talons in the heart of the dove. I despise the soulless man whose greed for gold impels him to strangle the laughter and song of his own family.

BRIGHT PROSPECTS FOR OKLAHOMA

OUR MOST IMPORTANT INDUSTRY
TAKES FAVORABLE
TURN.

OIL DEVELOPMENT IS GREAT

A Pipe Line From Oklahoma to the
Gulf Will Make Greater Things
Possible.

Guthrie, Ok., June 12.—Many things have occurred in Oklahoma during the past few weeks to make brighter conditions in the various oil fields of the state. There are definite and certain reports that the Standard Oil Company will, within thirty days, begin the construction of its pipe line from Oklahoma to the Gulf, via the Caddo oil field in Louisiana. It is also reported, seemingly accurately, that the Prairie Oil and Gas company will domesticate and put an end to all controversy between that company and the state administration. The visit of the Standard Oil officials, including John D. Rockefeller, Jr., and various other New York, Pittsburg and Ohio capitalists, and their inspection of the Mid-Continent field are also taken as a good sign by Oklahoma producers. The decided announcement that the pipe line will be built to the Gulf followed the visit of these officials. The producers are very anxious that the secretary of the interior, at Washington, yield to the request of the Standard company to make easier the construction of their line across Indian lands.

If the construction is commenced within thirty days, as announced, it is believed that a pipe line to the gulf will be completed within six months. Many of the producers see in this new line an increase in prices for crude oil, while others will be satisfied to have old prices remain and all oil taken by pipe lines as fast as produced. The producers hope the new line will settle the question to their benefit relative to the alleged discrimination against Oklahoma in the market price for crude oil. Producers maintain that the Oklahoma product is of a better grade than the Illinois or Pennsylvania because of the freshness of it, but that it sells for a much lower price.

Want Water Transportation.

The producers of the Mid-Continent field, in particular, are agitating the opening of the Arkansas River for navigation. This has been urged by the Commercial clubs of Muskogee, Tulsa, Sapulpa and Bartlesville, as well as other cities along the Arkansas River, for several years, but not until recently have the oil operators interested themselves. They claim that if the oil products of Oklahoma can be shipped to the sea at a small cost that the day of 41c oil will be over. Engineers who have examined the Arkansas river, say that it would cost less than \$5,000,000 to make it navigable as far as the Mississippi by a system of locks and dams. Engineer William Parkins, who recently made an examination of the bed of the Arkansas, states that it will not be nearly as difficult as the task was to make the Ohio navigable.

In connection with the manner of oil transportation comes the announcement of the Midland Valley Railroad that about July 25 it will inaugurate a reduced rate for the transportation of crude oil from all Midland Valley leading points to the different points of consumption in Texas. This will permit the Muskogee and Glenn oil fields to compete successfully with oil companies in the Texas fields. The proposed reduction contemplates a 20c rate in place of the 25c schedule; 18c for the 22c rate, and 15c for the 20c rate, making a total reduction of at least 20 per cent in the existing schedule.

Increases Crude Oil Prices.

The Texas Pipe Line Company has posted a notice to the effect that beginning immediately it will pay 33c for oil instead of 30c. Just what the company means by this rate is a matter of conjecture among producers. By some it is believed that the company is starting a fight on its competitors, and the producers are hop-

ing such is the case. On the other hand it is maintained that the Texas company can handle more oil than it is now getting, and makes a raise in price to encourage runs. Neither the Gulf Pipe Line company have announced any increase. Both, however, have been paying more than the Texas company until the latter's recent increase.

Many producers believe that the next few months will prove the best in the history of the Mid-Continent oil field. The tendency is still to curtail productions and not much drilling is being done in proportion to what might be done. Many deals are pending and many of these involve more land than has changed hands in one lump for a long time. There are many buyers in the field.

The Yeager-Strain bill, enacted by the recent Oklahoma Legislature, is operating to the benefit of the producers in many ways. The days when offset wells could be drilled around a good lease, forcing the lessee to drill in order to hold his title and not forfeit the lease, seem to be past. The producer is not subject to this particular method of pinching any more. The action of the Interior Department in relinquishing supervision over thousands of acres of good oil lands, owned by Indians, has also made better oil conditions. Every act that does away with government red tape tends to push things for the producer. It is no longer necessary, in numerous instances, to tie up large sums in escrow for an indefinite period while Indian agents and the department at Washington go into the details of every deal to determine whether or not a lease or an assignment should be approved.

New Wells Being Drilled.

In spite of the general feeling that produce should be curtailed every time a new pool is opened the tools get busy. Numerous wells have been drilled in North Tulsa or Flat Rock pool, but recently the Muskogee field is attracting the most attention in Central Oklahoma. A new streak, or a continuation in the sand from the Muskogee field, has just been discovered and by far the best wells in the Muskogee fields have been brought in during the past few weeks. One of the new wells drilled recently had an initial production of 12,000 barrels daily. The oil was discovered at a depth of 1,035 feet and upon discovery flushed to the top of the derrick. Some good prices have been paid in the Muskogee field for oil leases.

The citizens of Henryetta are jubilant over the bringing in of a 200 barrel well and much prospecting is being done. A well has also been brought in near Butler by John Wallace, a new comer, in the mid-continent field. The well is five miles from any other producer and is a "wild-cat" of the extreme kind. The usual scramble for oil leases followed the discovery. A 400-barrel well was also brought in recently in the Morrison field. The land on which it was discovered was exceptionally valuable at one time, but was abandoned by reason of a dry hole being drilled.

The Matson Oil Company during the week disposed of its one-half interest in holdings in the Osage Nation to William McBride. Eleven wells have been drilled on this eleven hundred acres, all of them strong producers, starting at 1,600 to 2,000 barrels daily and still producing a lot of oil. One well is still producing over seven hundred barrels a day. Within twenty months 1,200,000 barrels have been run from this lease. The Cudahy Oil company completed two wells near Bartlesville, both of them producers.

F. G. Pettibone, vice-president and general manager of the Santa Fe railroad, announced that twenty additional wells will be put down in the Wheeler field near Ardmore as fast as men and rigs can do the work, working night and day. As soon as the production has reached 1,000 barrels daily a pipe line or a railroad will be built to the field. The production now is 750 barrels daily. He also stated that the supply of natural gas from wells now in the Wheeler field is flowing freely and that all the gas necessary was being produced.

An attempt is being made on the "101 Ranch" in Northern Oklahoma to strike oil or gas, the driller now being at a depth of 1,600 feet with

MEN OR YOUNG MEN Who Put Their confidence in us in this matter of clothes are entitled to know the truth about what they buy here; and we're glad to have them know it; there's nothing here that we're afraid to tell the truth about.

Hart Schaffner & Marx clothes are all-wool; and all-wool is the only real, full value in clothes. We have some clothes that are not all-wool; we'll tell you so if you select any of them. We don't advise you to buy cotton-mixed goods; they're mostly disappointing, and that's bad for us as well as you. We have them here to sell to men or the young men who are not yet wise enough to insist on all-wool.

We'll try to persuade you to buy Hart Schaffner & Marx all-wool clothes; they'll cost more because they're worth more.

Special Cut Prices on Suits

indications of gas. They expect to go down until they reach the depth drilled in the Bartlesville and Pawhuska fields. Additional drilling is also in progress near Madill and Ada in Southern Oklahoma.

INITIATIVE AND REFERENDUM.

If Election Law Went Into Effect on
Approval, New Petitions Will
Be Necessary.

Guthrie, Ok., June 12.—The Attorney General has been asked for an opinion as to whether the general election law enacted by the last legislature, and embodying the ribbon ballot idea of other states, is carrying into effect provisions of the initiative and referendum. The republican state organization secured petitions against the election law, filing 27,812 names on May 29 and 3,239 on June 10. Only between 12,000 and 13,000 were necessary to have the law referred to the people for decision by ballot. If the law is con-

strued as carrying into effect provisions of the initiative and referendum, as has been claimed, then, by the terms of the constitution, it was probably in effect the day it was approved by the governor. The constitution provides that such laws do not require the emergency clause to give them immediate application. Should the ruling be sustained the opposing organization would be forced to initiate a law repealing the ribbon ballot act, as the referendum petitions would be, it is held, of no effect.

John Scribner Injured.

As one of the officers at the jail was closing a cage door this morning John Scribner, one of the prisoners, had his hand caught between the door and the jam and fearfully mashed. While one or two bones are fractured it is not thought that the injury will result seriously.

WITH OUR EXCHANGES

When the law permits the doping
of food and forbids the poisoning of
whiskey, it's enough to drive a man
to drink.—Baxter Citizen.

A patent medicine advertisement
is headed: "Don't read this if you are
worth \$50,000." We are willing to
admit that that sort of advertising
doesn't pay.—Konawa Chief-Editor.

It is getting to be dangerous for
a man named John Hopkins to live in
Oklahoma. The state has hung one
man of that name, and now has sen-
tenced another to the same fate.—
Frederick Leader.

The El Reno American speaks of
Oklahoma City reaping the whirl-
wind. There are lots of good peo-
ple who would be glad to act as har-
vest hands reaping the sort of whirl-
wind Oklahoma City has reaped to
date.—McAlester News-Capital.

Recent happenings at Washington
have opened the eyes of both demo-
crats and republicans to the fact that
this country needs must rid itself of
a bunch of old nesters who are not
statesmen but spoilsmen, not patri-
ots but tools of capitalistic inter-
ests.—Oklahoman.

If there is one thing more annoy-
ing and more conducive to uncharis-
tian thought than having a pestifer-
ous fly conceive a fondness for one's
bald spot, it is to lay one's new five
dollar straw upon an innocent sheet
of tanglefoot.—Muskogee Phoenix.

According to dispatches from Guth-
rie representatives of the State who
have the exclusive sale of whiskey
in this State have started out in a
tour of the counties in an effort to
run down the competitors of the
state dispensary joints and to orga-
nize civic leagues to assist in the
teaching of the virtues of Sunny
Brook as a sure cure for snake bites,
seven year itch, malaria, rheuma-
tism and other various diseases. Veri-
ly, the world do move and the "pee-
pul" rule.—Wapanucka Press.

A newspaper can never very cred-
itably represent a town whose busi-
ness men do not advertise. He may
howl himself hoarse bragging about
the vim, energy and enterprise of
town, but if his declarations are not
backed up by a liberal amount of
advertising by the business men of
the town, the world will be slow to
take his statement as true. It takes
more than the unsupported testimony
of the local newspaper man to prove
to the world that his town is the
financial center, the business center,
the best market, and the best place
on earth to buy goods; his evidence
needs corroboration.—Exchange.

"Aha!" may Purcell now exclaim, as
did the Indians when Columbus first
landed in America "at last we are
discovered!" The Oklahoman, after

having received the newspapers from
Purcell for several weeks, after no-
tices of meetings in the interests
of the capital location matter had
been more than once sent by its local
correspondent, suddenly finds that
Purcell is in the race, and hands us
out a line of talk, something after the
fashion in which one may imagine
Goliath commented upon the ap-
pearance of the little shepherd boy
upon the scene. But Goliath's size
didn't save him, and this modern pro-
totype of the shepherd by has a
quiver well supplied with pebbles for
his sling.—Purcell Register.

The Kansas City Star, in an article
on the renowned Missouri mule,
pays the faithful animal some hand-
some compliments. "The 'fool mule'
of the comic paper is not such a fool
after all," said the Star. "He takes
care of himself, and the barn man of
any big teaming company will tell
you a pair of mules will outlast two
or three pairs of horses at hard
work. A mule could give an athlete
points on training. He will not over-
eat or over-drink. After hard work
he will not eat or drink until rested.
He seems to know that he cost
his owner no small sum, and will not
allow a careless driver to over-work
him. He is not of a nervous temper-
ament, and loses no energy worrying,
as the horse does. To the diseases
that attack the horse in the south
he is immune. Everything consid-
ered, the demand for the mule is a just
tribute to his usefulness. Missourians
should have a proper pride in the
Missouri mule, the ideal beast of
draft and burden for the South."—
Muskogee Times-Democrat.

To My Friends.

I desire to thank our many friends
who have assisted us during the ill-
ness and death of our son and brother,
and to state that I will resume
my business about Wednesday of this
week. W. T. Tarkenton.

Two More Weeks.

Our trimmer, Miss Adams, will be
with us this season. We still have a
beautiful line of the latest styles
in shapes and trimmings which we
will not carry over, and will cut
the prices that any one will be able
to buy a fine hat for a little of
nothing. We have one lot \$2.00 and
\$1.50 hats your choice 98c each. Miss
Adams will be glad to give you good
bargains in hats before she leaves
Ada. Come to see her at the Grand
Leader.

Beware of Ointments for Catarrh that Contain Mercury.

as mercury will surely destroy the
sense of smell and completely de-
range the whole system when enter-
ing it through the mucous surfaces.
Such articles should never be used
except on prescriptions from reput-
able physicians, as the damage they
will do is ten fold to the good you
can possibly derive from them. Hall's
Catarrh Cure, manufactured by F. J.
Cheney & Co., Toledo O., contains no
mercury, and is taken internally, act-
ing directly upon the blood and mucous
surfaces of the system. In buying
Hall's Catarrh Cure be sure you get
the genuine. It is taken internally
and made in Toledo, Ohio, by F. J.
Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c per
bottle.

AROUND THE HOUSE

CHAT ON MATTERS OF MORE OR LESS IMPORTANCE.

Useful Duster Devised from Worn-Out
Garment—Simple Method of
Marking Linen Before
Sending to Laundry.

Dusters—There is nothing that can
be used to dust with that can equal
the lower portion of a gauze under-
vest. Wet in warm water and wrung
out tight, it will take up every particle
of dust, and then, as it is rinsed, one
feels sure of actually getting rid of so
much dirt. Twenty years of dusting
highly finished furniture with a soft,
damp woven dust cloth has not dim-
med its luster.

Old Sheets—When sheets wear out
past recovery, tear out the center or
worn part, sew up in a double seam,
thus hiding the edges, and sew one,
two or three brass rings as needed on
to one end. Use this to hang over
nice dresses in the closets. If too
long, cut a piece off from the bottom
and use to cover the sleeve board or,
if of good quality, this piece would
make a pillow case.

Stockings—All stockings should be
marked so as to mate. Initials can be
worked in long outlining stitches with
either white thread or different col-
ored silks for different members of the
family. Use the Roman numerals with
one long stitch for each line to mate
them. This sort of marking takes but
a few moments as soon as the stock-
ings are bought, and saves much time
in sorting and gives general satis-
faction in the household.

For Safety—One mother with sev-
eral daughters has hit upon a good
plan to protect her right of owner-
ship. Each week when preparing
clothes for the Monday wash she
takes a needle with white thread and
runs a stitch through one corner of
each of her own handkerchiefs, also
each stocking. The maid is instructed
to dampen the handkerchiefs and
break the thread only when ready to
iron them and see that they are
placed on her bureau. The same in-
structions are given in regard to the
stockings.

Lace Curtains—All lace curtains
should be soaked for a least an hour
in cold water in which a little borax
has been dissolved before putting them
into warm suds. This takes out the
smoky odor and softens the dirt.

Ice Pick—Always remember that
if the ice pick is lost or misplaced for
the time being, an ordinary hat pin
gradually forced into ice will produce
a crack and separate the ice without a
sound. Nurses in hospitals use needles
and even common pins to crack ice for
patients.

Shoes Blacked—There is no reason
why young or old should be careless
about having their footwear kept in
proper condition. A lamb's wool glove
and dauber can be bought for ten
cents and a box of blacking for an-
other dime. By being careful to never
use but one side of the dauber there
will be no need of soiling the fingers,
and the wool glove gives a fine polish
with very little effort.

Furniture Polish—All outlay of en-
ergy required in polishing furniture
after the fall cleaning is well repaid
in the appreciation shown by every
member of the family. A well tested
polish is made of one part benzine,
one part linseed oil and two parts tur-
pentine. Use two cloths, one to rub
on the liquid and the other for polish-
ing.

Aldus Manutius Author of System of
Punctuation.

Punctuation by means of stops and
points, so as to indicate the mean-
ing of sentences and assist the reader
to a proper enunciation, is ascribed
originally to Aristophanes, a gram-
marian of Alexandria, Egypt, who
lived in the third century B. C. What-
ever his system may have been, it
was subsequently neglected and for-
gotten, but was reintroduced by
Charlemagne, the various stops and
symbols being designed by Warne-
fried and Alcuin.

The present system of punctuation
was introduced in the latter part of
the fifteenth century by Aldus Manu-
tius, a Venetian printer, who was re-
sponsible for our full stop, colon,
semicolon, comma, marks of inter-
rogation and exclamation, parenthesis
and dash, hyphen, apostrophe and quo-
tation marks. These were subsequent-
ly copied by other printers, until their
use became universal.

Most ancient languages were inno-
cent of any system of punctuation. In
many early manuscripts the letters
are placed at equal distances apart,
with no connecting link between even
in the matter of spacing, an arrange-
ment which must have rendered read-
ing at sight somewhat difficult.

Liberty—Principle and Sentiment.

No theory is of much service in the
matter without a character responding
to the theory—without a feeling which
prompts the assertion of individual
freedom and is indignant against ag-
gressions on that freedom, whether
against self or others. Men care nothing
about a principle, even if they un-
derstand it, unless they have emotions
responding to it. When adequately
strong the appropriate emotion
prompts resistance to interference
with individual actions, whether by an
individual tyrant or by a tyrant major-
ity; but at present, in the absence of
the proper emotion, there exists al-
most everywhere the miserable super-
stition that the majority has a right to
dictate to the individual about every-
thing whatever.—By Herbert Spencer,
in letter to M. D. Conway.

HAS FINE HEAD FOR BUSINESS.

Woman's Methods That Aroused Won-
der and Admiration.

"If I had my wife's head and nerve
I'd own half of Wall street in less
than five years," said the man. "It
is the way she manages, the clothes
proposition that aroused me to wonder
and admiration. Here is an example
of her thrift."

"Early last month she bought a
broadcloth dress which, with the ex-
tra charge for alterations, cost \$55.
Well, after she got the suit home she
didn't like it. The store objected at
first to taking it back, but her per-
suasive tongue won them over, and
after deducting \$5 for the alterations,
they refunded the money. Last week,
when nosing around, she saw that
same suit on sale for \$35. My wife,
it seems, has such a peculiar figure
that the suit, after being made to fit
her wouldn't fit anybody else, so
there was that \$50 garment, and cheap
at the price, going for almost one-
third off. She of course snatched up
the bargain. No more fitting or mak-
ing over was necessary, so even when
counting in her \$5 for alterations,
she saved \$15 on the deal. I'd just
like you to show me any man who
could cor out that well on a trans-
action in clothes."

CUSTOM PUZZLED THE VISITOR.

Wedding Ring Arrangement That
Englishman Thought Queer.

"Of all your queer American cus-
toms," said the Englishman, "and you
have many, you know—oh, yes, very
many—the queerest is that of the old-
est daughter of the first marriage of
a woman who has been married twice
wearing her mother's first wedding
ring."

"How is that?" said the American
woman. "That sounds rather com-
plicated. I am afraid I didn't just
catch it."

The Englishman repeated.
"In the two weeks that I have been
in New York," he elucidated still
further, "I have met four maiden
ladies of 35 to 45 years of age who
wore wedding rings. I asked for an
explanation, and each time I found
that it was the ring with which the
lady's father married her mother.
When the mother married again she
gave the ring to her oldest daughter.
Don't you think that queer?"

"I certainly do," said the American
woman, "still I can't believe that it is
a national custom or I should have
heard of it before."—New York Press.

Lived Long as Hermit.

There has been discovered in the
Australian "bush" or forests a wild
Irishman, who had been leading a
hermit life for a quarter century. He
was of gigantic stature and enormous
strength—a good advertisement for
vegetarianism, as he had not touched
animal food since his retirement from
civilization. His hair was four feet
long, matted and of considerable thick-
ness. He told the police he was a fol-
lower of Christ, Samson and Her-
cules. His name is John Bernard
Fitzgerald and he is 72 years of age.
He has never bathed, regarding the
practice as irreligious and unnatural.
The combined force of half a dozen
police, however, compelled him to
overcome his scruples.

Paid for Bride by the Pound.

In the village of Kolked, in Hun-
gary, it has since time immemorial
been customary for the bridegroom to
give the bride's parents some com-
pensation before the wedding. The
other day a peasant farmer named
Kotvoes and the parents of his pretty
young betrothed could not come to
terms as to the amount, and so they
agreed to make the mayor arbitrator.
That good man, a cattle dealer, valued
the bride at 60 cents a pound. As she
weighed 85 pounds the happy bride-
groom had to pay only \$51.60, and
thought himself lucky to get a wife so
cheap.

Chemical Formulas.

In chemistry the elements are rep-
resented by accepted abbreviations,
called symbols, each of which indi-
cates a single atom of the element.
When more than one atom is to be
represented, figures are placed to the
right of the symbol either above or
below the line. A molecule represent-
ing a compound is indicated by a
series of such symbols called a for-
mula; thus alcohol has for its formula
C₂H₆O, which shows that a molecule
of this substance contains two atoms
of carbon, six of hydrogen and one of
oxygen.

Breaking the Rule.

"At our establishment," said the
merchant, "we are training our em-
ployees to say 'Good-morning,' or 'Good-
afternoon' at the telephone, instead of
'Hello.'"

"How does it work?"

"It works very well, indeed. Seems
to please our customers and gives the
establishment an air of dignity. The
only trouble we have is with me. I'm
the president, you know, and I forget.
There's nobody to jog my memory nor
call me down. Otherwise it works all
right."

The Value of Politeness.

Hollow trees are always the stiffest,
but the mightiest oak, it is found, can
bend. The more exalted a man is by
station, the more powerful should he
be by kindness. There is no policy
like politeness, since a good manner
often succeeds where the best tongue
has failed. Politeness is most useful
to inspire confidence in the timid and
encourage the deserving.—The Sunday
Strand.

Church Directory

Asbury Methodist Church.

Services first and third Sunday
mornings at 11 and Sunday evening,
also fourth Sunday evening of each
month.

Sunday school every Sunday 9:45
a. m. W. L. Roddie, superintendent.

SHERMAN CONCRETE CO.

ICE CREAM HOME PRODUCT

We have our own Dairy and up-to-date
Ice Cream Factory. Both are run under
the inspection of the Pure Food Law. Our
factory is in charge of one of the best
cream makers that is obtainable. Pre-
vious to coming to us Mr. Prescott had
charge of one of the largest factories in
Kansas City. We put up the goods. With all the above advantages,
why shouldn't we? Insist on cream made at our factory and you will
not only get the best, but are patronizing a growing home industry.

R. L. McGUYRE, Prop.

Sewer System for Madill.
Madill, Okla., June 12.—At a special meeting of the city council last night, called for that purpose a contract was entered into with S. D. Lipscomb, representing the Southwestern Engineering Co. of Oklahoma City, to establish grades for a large contract for sidewalk paving and for plans and specifications for a sewerage system costing not less than \$15,000.

Oil and Gas Tax.
Guthrie, Okla., June 12.—The state board of equalization held a session today to hear the oil and gas men with regard to the average 1000 per cent raised in assessed valuations above returned valuation of the six smaller oil and gas pipe lines of the state. The board merely listened to the arguments and gave the pipe line men until next Saturday to produce supplementary reports.

The assessing of the railroads of the state will be taken up by the board next week, very probably at a meeting called for Monday.

JOHN TARKENTON.

Dies Yesterday After Several Weeks' Illness.

John Tarkenton, aged 22 years died at the home of his brother W. T. Tarkenton in this city at 2:45 o'clock yesterday afternoon after an illness of several weeks. Mr. Tarkenton is the gentleman upon whom Dr. Brownall operated on several weeks ago and from whom he contracted blood poisoning causing his death.

The funeral and burial will take place at Bebee this afternoon.

Miss Barnard's Plans.

Guthrie, Ok., June 13.—Miss Kate Barnard, state commissioner of charities and corrections, now attending the national charities conference in Buffalo, will not return to Guthrie until the first of July. After the conference ends she will be the guest of Elbert Hubbard, publisher of the Philistine, at East Aurora, N. Y.

TARIFF BILL IN SENATE IN FINAL CONSIDERATION

MAY BE BROUGHT TO CLOSE BY NEXT FRIDAY.

Income Tax Amendments Will Then Be Taken Up and Vote May Be Reached.

Washington, June 13.—The feeling in all factions of the senate is that the tariff bill is approaching the last day's of its consideration in the senate. Senator Aldrich is hopeful that the end may be reached by next Saturday, and many of the conservative republicans, as well as many of the democrats, are inclined to agree with the prediction. The progressive republicans are not quite so optimistic, but Senator Beveridge is of the opinion that the final vote will not be postponed beyond the end of next week.

The income tax amendments to the bill will be taken up Friday and a vote may be reached on the proposition the same day. It is possible that efforts may be made to secure a still further postponement of a vote.

This week will be devoted to a general cleaning up. With the exception of one disputed point in the silk schedule, the senate last week concluded its second consideration of the bill and disposed of all paragraphs of the schedule on which the committee had reported. Among the questions not acted upon in committee were many disputed points, but there will be an effort to clean them up rapidly, and it is believed comparatively little time will be taken on any of them. Among the more important provisions still to be considered are those pertaining to lumber wool pulp, print paper, hides, coal, zinc, window glass, scrap iron, cotton ties, cotton bagging, leather goods, binding twine and petroleum.

Rought lumber remains on the dutiable list, but the question of amount of duty and the differential between the duty on rough lumber and on the manufactured article remains to be settled. In the paper schedule the principal items to be considered are the duty on ground wood and print paper. It seems probable ground wood or pulp will be left free, but the rate on paper will be made \$4 per ton instead of \$2, as fixed by the house, and \$6 as in the present law. This provision will be left open as long as possible, to permit Senator Hale, who has been absent when the subject comes up. He will stand out staunchly for a stiff duty on all of these articles.

Hides, coal and petroleum are giving the finance committee no little concern, but present indications are the senate will place a duty on all of these articles. Zinc, zinc ore and zinc in blocks, pigs and sheets, and zinc paint products are still to be considered, as are sulphate of ammonia and barytes. Sulphate of ammonia is used in fertilizing, and farmers are making strenuous efforts to have it retained on the free list, where the house bill put it, while the manufacturers are contending for a duty. It now appears probable the farmers will win. Barytes is a Missouri product, and Missouri republicans are strongly urging an increase over the senate and house rates. The outcome is uncertain.

There is a demand for a reduction and reclassification of the window glass schedule, but any prediction as to what the result might be would be misleading. The same may be said of the contest between pig iron and scrap iron in the metal schedule. The house placed a duty of \$2.50 per ton on pig, but gave a scrap iron a duty of only 50c. The senate raised scrap to the same level with pig and the contest is between the rates of the two houses on these items. The Southern Senators, are making an earnest though probably, as it now appears, an unsuccessful effort to have cotton ties and cotton bagging made free of duty and the binding twine provision has been held up until the cotton tie question could be decided, probably on the theory the Northwestern senators could be prevailed upon to combine with the southern senators in the interest of the two articles together. The leather schedule, including leather, and leather goods, is suspended awaiting the decision on hides.

Among other important articles which remain undecided are pineapples, on which the Florida senators ask an increase.

ROCK ISLAND AND FRISCO.

Are They the Same Corporation or Are They Biting the People?

The question of whether the Rock Island railroad and the Frisco railroad are one railroad or two, will be investigated by the corporation commission at Guthrie Tuesday of this week. At Present freight rates are calculated on the basis of a two-road plan. The two roads control two-thirds of the railway mileage of the State of Oklahoma and if the corporation commission decides that the roads operate under a single management it will mean a decided reduction of freight rates, which will accrue to the profit of a large percentage of shippers in the state.

The two roads maintain business offices together in this and other cities and information is in the hands of the corporation commission that the two roads are in reality a unit corporation.

A. S. Wyly Reappointed.

Guthrie, Ok., June 12.—A. S. Wyly of Tahlequah has been reappointed as a member of the board of state normal regents, vice the resignation of W. W. Hastings of Tahlequah. Some time ago Mr. Wyly held the place but when elected as president of the Cherokee State Normal school at Tahlequah, resigned and Mr. Hastings was appointed. Then Mr. Wyly resigned the presidency to accept a position with the Cherokee schools, following which Mr. Hastings withdrew from the state normal board, and Mr. Wyly is back on the job according to an appointment filed by Gov. Haskell with the secretary of state today.

Second Half of 1908 Taxes.

Guthrie, Ok., June 13.—The second half of the 1908 taxes will be delinquent on June 15, but State Auditor Trapp believes County Commissioners have the authority to grant extensions if deemed by them necessary. Originally the taxes were delinquent on Jan. 15. Owing to excessive rates being applied in some counties the legislature extended the time ninety days. This period expires Tuesday, and in the meantime a number of the counties have reduced their levies.

Purcell in the Race.

Purcell, Okla., June 12.—At a large and enthusiastic mass meeting held at the court house this afternoon it was unanimously agreed by resolution that Purcell, the only aspirant in the old Indian Territory, should become a candidate for the location of the state capital. Committees were appointed to have charge of the financial and executive side of the campaign and work will begin at once.

ABOUT ADVERTISING—

The Dollar That Can't Be Spent

By Herbert Kaufman

Every dollar spent in advertising is not only a seed dollar which grows a profit for the merchant but is actually retained by him even after he has paid it to the publisher.

Advertising creates a gold will worth the cost of the publicity.

It actually costs nothing. While it uses funds it does not use them up. It helps the founder of a business to grow rich and at the same time keeps his business from not dying when he does.

It eliminates the personal equation. It perpetuates confidence in the store and makes it possible for a merchant to withdraw from business without having the profits of the business withdrawn from him. It changes a name to an institution—an institution that will survive after the death of its builder.

It is really an insurance policy which costs nothing—pays a premium each year instead of calling for one, and renders it possible to change the entire personnel of a business without disturbing its prosperity.

Advertising renders the business stronger than the man—independent of his presence. It permanentizes systems of merchandising, the track of which is left for others to follow.

A business which is not advertised must rely upon the personality of its proprietor, and personality in business is a decreasing factor. The public does not want to know the man who owns the store—it isn't interested in him, but in his goods. When an unadvertised business is sold it is only worth as much as its stock of goods and fixtures. There is no good will to be paid for—it does not exist—it has not been created. The name over the door means nothing except to the limited stream of people from the immediate neighborhood, any of whom could tell you more about some store ten miles away which has regularly delivered its shop news to their breakfast tables.

It is as shortsighted for a man to build a business which dies with his death or ceases with his inaction as it is unfair for him not to provide for the continuance of its income to his family.

MACK LEE CASE TO A CLOSE

TAKING OF TESTIMONY CLOSSES
AT 2:30 TODAY.

SEVEN LAWYERS TO SPEAK

Final Finish to Come This Afternoon
and Tonight When Attorneys
Have the Floor.

The case of Mack Lee, charged with the murder of Marshal Zeke Putman at Allen on the night of February 16th, this year, will be closed when the attorneys have delivered their argument to the jury. The taking of testimony closed at 2:30, and at 3:30 the argument was begun.

The forenoon today was consumed in taking evidence to ascertain whether or not Mack Lee was in Centrahoma making a land deal on the 23rd day of February, as he had testified. The register of the Stewart hotel at Oklahoma City was introduced by the hotel clerk and showed that Lee had registered at Oklahoma City on the evening of the 22nd and had left on the following day. The point was raised by reason of a contract which was introduced by the defense and which was supposed to have been executed at Centrahoma, controverting certain evidence of John Scribner. This point was the bone of contention from early this morning until the taking of testimony was closed.

Several character witnesses have been introduced, many of whom discredited the character of Lee's witnesses. Character witnesses for Lee give him a good name and vouch for his standing in the community where he lives.

This has been a long, hard fought case, and one which the public has watched with much interest. The people will await the verdict of the jury with the same earnestness which has characterized their attention from the beginning of the trial.

RESTRAINING ORDERS GRANTED.

Federal Judge at McAlester Acts in
Railroads' Tax Suits Against
State of Oklahoma.

McAlester, Ok., June 12.—The Missouri, Kansas and Texas, the Gulf, Colorado and Santa Fe, the Atchafalaya, Topeka and Santa Fe, the Fort Smith and Western and the Midland Valley railroad companies today filed thirty suits in the Federal court for the Eastern District of Oklahoma against county treasurers and sheriffs in nearly as many counties, seeking to restrain them from collecting taxes claimed to be illegally assessed against the railway companies. Unequal taxation is the chief ground alleged, and the constitutionality of the acts creating the Board of Assessors and the Board of Equalization is questioned. Judge Ralph E. Campbell this evening granted temporary restraining orders in all the cases.

WIFE SLAYER IS KILLED BY POSSE

CLAREMORE MAN PAYS QUICK
PENALTY FOR MURDER.

Kills His Wife and Meets Death
Himself Within Thirty
Minutes.

Claremore, Okla., June 12.—Henry Mosley, night watchman of the police force at Claremore, tonight at 7:30 killed his wife and was himself killed a half hour later by a posse of officers whom he resisted on the highway in attempting to escape.

Mrs. Mosley was shot twice, the first ball entering her heart and killing her instantly. The second entered the stomach.

Mosley, goaded by family troubles that had led some time ago to a separation, came home early this evening and finding his wife away, went to town and brought her home. The shooting occurred in the front yard.

Sheriff Stephens and two deputies overtook Mosley a half mile north of town. Mosley turned upon them and opened fire which the posse returned. Mosley was killed instantly by one of the posse.

Mosley was 40 years old and had been here for 20 years. There are three children in the family, the eldest 16 years old.

IN MATTER OF LICENSE.

Some Misunderstanding Which Should
Be Corrected.

Since the case of Mr. Lingenfelter was discussed in the newspapers several days ago a general misunderstanding among the farmers has been created. Several of them, in fact, have gone so far as to consult the city clerk as to whether or not they could sell their products on the streets of Ada without paying a license. The ordinance which provides that a license shall be paid by peddlers or hawkers applies only to persons who purchase wares and peddle them for a profit but not to a man who raises his products and disposes of them on the streets. A farmer, or any other person for that matter, can dispose of anything he produces to suit himself and there is no revenue charge attached, but a man who buys products from other producers and peddles them for profit, thereby making it a business is subject to the license.

To say that the producer cannot dispose of his products without paying for the privilege would be extremely unjust and such is not the intention of the ordinance, neither does such custom prevail.

Court Action Delayed.

Guthrie, Ok., June 12.—No action will be taken in the courts against the state board of affairs as contemplated by Superintendent Cameron of the board of normal school regents, until after the latter board has a meeting now called for June 15. At that time the question of testing the authority of the State board of affairs will be determined. The controversy grows out of the board's refusal to approve an estimate for about \$15,000 alleged to be due contractors working on the Weatherford school buildings. Members of the board of affairs say they do not know that a contract for the work has been made.

A Beautiful Thought.

The following sentiment is from the pen of Bob Taylor: "I would rather fill my purse with money and keep its gates ajar to my happy girls while yet they linger under my roof than to clutch it with a miser's hand until all the harp-strings of youth are broken and its music forever fled. I would rather spend my last nickel for a bag of stripped marbles to gladden the hearts of my barefooted boys than to deny them their childish pleasures, and leave them a bag of gold to quarrel over when I am dead. I abhor the pitiless hawk that circles in the air only to swoop down and strangle the song of the linnets or bury its talons in the heart of the dove. I despise the soulless man whose greed for gold impels him to strangle the laughter and song of his own family."

BRIGHT PROSPECTS FOR OKLAHOMA

OUR MOST IMPORTANT INDUSTRY
TRY TAKES FAVORABLE
TURN.

OIL DEVELOPMENT IS GREAT

A Pipe Line From Oklahoma to the
Gulf Will Make Greater Things
Possible.

Guthrie, Ok., June 12.—Many things have occurred in Oklahoma during the past few weeks to make brighter conditions in the various oil fields of the state. There are definite and certain reports that the Standard Oil Company will, within thirty days, begin the construction of its pipe line from Oklahoma to the Gulf, via the Caddo oil field in Louisiana. It is also reported, seemingly accurately, that the Prairie Oil and Gas company will domesticate and put an end to all controversy between that company and the state administration. The visit of the Standard Oil officials, including John D. Rockefeller, Jr., and various other New York, Pittsburgh and Ohio capitalists, and their inspection of the Mid-Continent field are also taken as a good sign by Oklahoma producers. The decided announcement that the pipe line will be built to the Gulf followed the visit of these officials. The producers are very anxious that the secretary of the Interior, at Washington, yield to the request of the Standard company to make easier the construction of their line across Indian lands.

If the construction is commenced within thirty days, as announced, it is believed that a pipe line to the Gulf will be completed within six months. Many of the producers see in this new line an increase in prices for crude oil, while others will be satisfied to have old prices remain and all oil taken by pipe lines as fast as produced. The producers hope the new line will settle the question to their benefit relative to the alleged discrimination against Oklahoma in the market price for crude oil. Producers maintain that the Oklahoma product is of a better grade than the Illinois or Pennsylvania because of the freshness of it, but that it sells for a much lower price.

Want Water Transportation.

The producers of the Mid-Continent field, in particular, are agitating the opening of the Arkansas River for navigation. This has been urged by the Commercial clubs of Muskogee, Tulsa, Sapulpa and Bartlesville, as well as other cities along the Arkansas River, for several years, but not until recently have the oil operators interested themselves. They claim that if the oil products of Oklahoma can be shipped to the sea at a small cost that the day of 41c oil will be over. Engineers who have examined the Arkansas river, say that it would cost less than \$5,000,000 to make it navigable as far as the Mississippi by a system of locks and dams. Engineer William Parkins, who recently made an examination of the bed of the Arkansas, states that it will not be nearly as difficult as the task was to make the Ohio navigable.

In connection with the manner of oil transportation comes the announcement of the Midland Valley Railroad that about July 25 it will inaugurate a reduced rate for the transportation of crude oil from all Midland Valley leading points to the different points of consumption in Texas. This will permit the Muskogee and Glenn oil fields to compete successfully with oil companies in the Texas fields. The proposed reduction contemplates a 20c rate in place of the 25c schedule; 15c for the 22c rate, and 15c for the 20c rate, making a total reduction of at least 20 per cent in the existing schedule.

Increases Crude Oil Prices.

The Texas Pipe Line Company has posted a notice to the effect that beginning immediately it will pay 32c for oil instead of 30c. Just what the company means by this rate is a matter of conjecture among producers. By some it is believed that the company is starting a fight on its competitors, and the producers are hop-

ing such is the case. On the other hand it is maintained that the Texas company can handle more oil than it is now getting, and makes a raise in price to encourage runs. Neither the Gulf Pipe Line company have announced any increase. Both, however, have been paying more than the Texas company until the latter's recent increase.

Many producers believe that the next few months will prove the best in the history of the Mid-Continent oil field. The tendency is still to curtail productions and not much drilling is being done in proportion to what might be done. Many deals are pending and many of these involve more land than has changed hands in one lump for a long time. There are many buyers in the field.

The Yeager-Strain bill, enacted by the recent Oklahoma Legislature, is operating to the benefit of the producers in many ways. The days when offset wells could be drilled around a good lease, forcing the lessee to drill in order to hold his title and not forfeit the lease, seem to be past. The producer is not subject to this particular method of pinching any more. The action of the Interior Department in relinquishing supervision over thousands of acres of good oil lands, owned by Indians, has also made better oil conditions. Every act that does away with government red tape tends to push things for the producer. It is no longer necessary, in numerous instances, to tie up large sums in escrow for an indefinite period while Indian agents and the department at Washington go into the details of every deal to determine whether or not a lease or an assignment should be approved.

New Wells Being Drilled.

In spite of the general feeling that produce should be curtailed every time a new pool is opened the tools get busy. Numerous wells have been drilled in North Tulsa or Flat Rock pool, but recently the Muskogee field is attracting the most attention in Central Oklahoma. A new streak, or a continuation in the sand from the Muskogee field, has just been discovered and by far the best wells in the Muskogee fields have been brought in during the past few weeks. One of the new wells drilled recently had an initial production of 12,000 barrels daily. The oil was discovered at a depth of 1,035 feet and upon discovery flushed to the top of the derrick. Some good prices have been paid in the Muskogee field for oil leases.

The citizens of Henryetta are jubilant over the bringing in of a 200 barrel well and much prospecting is being done. A well has also been brought in near Butler by John Wallace, a new corner, in the mid-continent field. The well is five miles from any other producer and is a "wild-cat" of the extreme kind. The usual scramble for oil leases followed the discovery. A 400-barrel well was also brought in recently in the Morrison field. The land on which it was discovered was exceptionally valuable at one time, but was abandoned by reason of a dry hole being drilled.

The Matson Oil Company during the week disposed of its one-half interest in holdings in the Osage Nation to William McBride. Eleven wells have been drilled on this eleven hundred acres, all of them strong producers, starting at 1,600 to 2,000 barrels daily and still producing a lot of oil. One well is still producing over seven hundred barrels a day. Within twenty months 1,200,000 barrels have been run from this lease. The Cudahy Oil company completed two wells near Bartlesville, both of them producers.

F. G. Pettibone, vice-president and general manager of the Santa Fe railroad, announced that twenty additional wells will be put down in the Wheeler field near Ardmore as fast as men and rigs can do the work, working night and day. As soon as the production has reached 1,000 barrels daily a pipe line or a railroad will be built to the field. The production now is 750 barrels daily. He also stated that the supply of natural gas from wells now in the Wheeler field is flowing freely and that all the gas necessary was being produced.

An attempt is being made on the "101 Ranch" in Northern Oklahoma to strike oil or gas, the driller now being at a depth of 1,600 feet with

MEN OR YOUNG MEN Who Put Their
confidence in us in this matter of clothes are entitled to know the truth about what they buy here; and we're glad to have them know it; there's nothing here that we're afraid to tell the truth about.

Hart Schaffner & Marx clothes are all-wool; and all-wool is the only real, full value in clothes. We have some clothes that are not all-wool; we'll tell you so if you select any of them. We don't advise you to buy cotton-mixed goods; they're mostly disappointing, and that's bad for us as well as you. We have them here to sell to men or the young men who are not yet wise enough to insist on all-wool.

We'll try to persuade you to buy Hart Schaffner & Marx all-wool clothes; they'll cost more because they're worth more.

Special Cut Prices on Suits

that were from \$18 to \$25 are now going on.

indications of gas. They expect to go down until they reach the depth drilled in the Bartlesville and Pawhuska fields. Additional drilling is also in progress near Madill and Ada in Southern Oklahoma.

INITIATIVE AND REFERENDUM.

If Election Law Went Into Effect on
Approval, New Petitions Will
Be Necessary.

Guthrie, Ok., June 12.—The Attorney General has been asked for an opinion as to whether the general election law enacted by the last legislature, and embodying the ribbon ballot idea of other states, is carrying into effect provisions of the initiative and referendum. The republican state organization secured petitions against the election law, filing 27,812 names on May 29 and 3,239 on June 19. Only between 12,000 and 13,000 were necessary to have the law referred to the people for decision by ballot. If the law is con-

strued as carrying into effect provisions of the initiative and referendum, as has been claimed, then, by the terms of the constitution, it was probably in effect the day it was approved by the governor. The constitution provides that such laws do not require the emergency clause to give them immediate application. Should the ruling be sustained the opposing organization would be forced to initiate a law repealing the ribbon ballot act, as the referendum petitions would be, it is held, of no effect.

John Scribner Injured.

As one of the officers at the jail was closing a cage door this morning John Scribner, one of the prisoners, had his hand caught between the door and the jam and fearfully mangled. While one or two bones are fractured it is not thought that the injury will result seriously.

WITH OUR EXCHANGES

When the law permits the doping
of food and forbids the poisoning of
whiskey it's enough to drive a man
to drink.—Baxter Citizen

A patent medicine advertisement
is headed: "Don't read this if you are
worth \$50,000." We are willing to
admit that that sort of advertising
doesn't pay.—Konaawa Chief-Leader

It is getting to be dangerous for
a man named John Hopkins to live in
Oklahoma. The state has hung one
man of that name, and now has sen-
tenced another to the same fate.—
Frederick Leader.

The El Reno American speaks of
Oklahoma City reaping the whirl-
wind. There are lots of good peo-
ple who would be glad to act as har-
vest hands reaping the sort of whirl-
wind Oklahoma City has reaped to
date.—McAlester News-Capital

Recent happenings at Washington
have opened the eyes of both demo-
crats and republicans to the fact that
this country needs a must rid itself of
a bunch of old nesters who are not
statesmen but spoilsmen, not pa-
triot but tools of capitalistic inter-
ests.—Oklahoman.

If there is one thing more annoy-
ing and more conducive to uncharis-
tian thought than having a pestifer-
ous fly conceive a fondness for one's
bald spot, it is to lay one's new five
dollar straw upon an innocent sheet
of tanglefoot.—Muskogee Phoenix.

According to dispatches from Guthrie
representatives of the State who
have the exclusive sale of whiskey
in this State have started out in a
tour of the counties in an effort to
run down the competitors of the
state dispensary joints and to orga-
nize civic leagues to assist in the
teaching of the virtues of Sunny
Brook as a sure cure for snake bites,
seven year itch, malaria, rheuma-
tism and other various diseases. Ver-
ily, the world do move and the "pee-
pal" rule.—Wapanucka Press.

A newspaper can never very credi-
tably represent a town whose busi-
ness men do not advertise. He may
howl himself hoarse bragging about
the vim, energy and enterprise of
town, but if his declarations are not
backed up by a liberal amount of
advertising by the business men of
the town, the world will be slow to
take his statement as true. It takes
more than the unsupported testimony
of the local newspaper man to prove
to the world that his town is the
financial center, the business center,
the best market, and the best place
on earth to buy goods; his evidence
needs corroboration.—Exchange.

"Aha!" may Purcell now exclaim, as
did the Indians when Columbus first
landed in America "at last we are
discovered!" The Oklahoman, after

having received the newspapers from
Purcell for several weeks, after no-
tices of meetings in the interests
of the capital location matter had
been more than once sent by its local
correspondent, suddenly finds that
Purcell is in the race, and hands us
out a line of talk, something after the
fashion in which one may imagine
Goliath commented upon the ap-
pearance of the little shepherd boy
upon the scene. But Goliath's size
didn't save him, and this modern pro-
totype of the shepherd by has a
quiver well supplied with pebbles for
his sling.—Purcell Register.

The Kansas City Star, in an article
on the renowned Missouri mule,
pays the faithful animal some hand-
some compliments. "The 'fool mule'
of the comic paper is not such a 'fool'
after all," said the Star. "He takes
care of himself, and the barn man of
any big teaming company will tell
you a pair of mules will outlast two
or three pairs of horses at hard
work. A mule could give an athlete
points on training. He will not over-
eat or over-drink. After hard work
he will not eat or drink until rested.
He seems to know that he cost
his owner no small sum, and will not
allow a careless driver to over-work
him. He is not of a nervous tempera-
ment, and loses no energy worrying
as the horse does. To the diseases
that attack the horse in the south
he is immune. Everything considered,
the demand for the mule is a just
tribute to his usefulness. Missourians
should have a proper pride in the
Missouri mule, the ideal beast of
draft and burden for the South."—
Muskogee Times-Democrat.

To My Friends.

I desire to thank our many friends
who have assisted us during the ill-
ness and death of our son and brother,
and to state that I will resume
my business about Wednesday of this
week.—W. T. Tarkenton.

AROUND THE HOUSE

CHAT ON MATTERS OF MORE OR
LESS IMPORTANCE.

Useful Duster Devised from Worn-Out
Garment—Simple Method of
Marking Linen Before
Sending to Laundry.

Dusters—There is nothing that can
be used to dust with that can equal
the lower portion of a gauge under-
vest. Wet in warm water and wrung
out tight, it will take up every particle
of dust, and then, as it is rinsed, one
feels sure of actually getting rid of so
much dirt. Twenty years of dusting
highly finished furniture with a soft,
damp woven dust cloth has not dim-
pled its luster.

Old Sheets—When sheets wear out
past recovery, tear out the center or
worn part, sew up in a double seam,
thus hiding the edges, and sew one,
two or three brass rings as needed on
to one end. Use this to hang over
nice dresses in the closets. If too
long, cut a piece off from the bottom
and use to cover the sleeve board, or,
if of good quality, this piece would
make a pillow case.

Stockings—All stockings should be
marked so as to mate. Initials can be
worked in long outlining stitches with
either white thread or different col-
ored silks for different members of the
family. Use the Roman numerals with
one long stitch for each line to mate
them. This sort of marking takes
but a few moments as soon as the
stockings are bought, and saves much
time in sorting and gives general sat-
isfaction in the household.

For Safety—One mother with sev-
eral daughters has hit upon a good
plan to protect her right of owner-
ship. Each week when preparing
clothes for the Monday wash she
takes a needle with white thread and
runs a stitch through one corner of
each of her own handkerchiefs, also
each stocking. The maid is instructed
to dampen the handkerchiefs and
break the thread only when ready to
iron them and see that they are
placed on her bureau. The same in-
structions are given in regard to the
stockings.

Lace Curtains—All lace curtains
should be soaked for a least an hour
in cold water in which a little borax
has been dissolved before putting them
into warm suds. This takes out the
smoky odor and softens the dirt.

Ice Pick—Always remember that
if the ice pick is lost or misplaced for
the time being, an ordinary hat pin
gradually forced into ice will produce
a crack and separate the ice without a
sound. Nurses in hospitals use needles
and even common pins to crack ice for
patients.

Shoes Blacked—There is no reason
why young or old should be careless
about having their footwear kept in
proper condition. A lamb's wool glove
and dauber can be bought for ten
cents and a box of blacking for an-
other dime. By being careful to never
use but one side of the dauber there
will be no need of soiling the fingers,
and the wool glove gives a fine polish
with very little effort.

Furniture Polish—All outlay of en-
ergy required in polishing furniture
after the fall cleaning is well repaid
in the appreciation shown by every
member of the family. A well tested
polish is made of one part benzine,
one part linseed oil and two parts tur-
pentine. Use two cloths, one to rub
on the liquid and the other for polish-
ing.

Aldus Manutius Author of System of
Punctuation.

Punctuation by means of stops and
points, so as to indicate the mean-
ing of sentences and assist the reader
to a proper enunciation, is ascribed
originally to Aristophanes, a gram-
marian of Alexandria, Egypt, who
lived in the third century B. C. What-
ever his system may have been, it
was subsequently neglected and for-
gotten, but was reintroduced by
Charlemaigne, the various stops and
symbols being designed by Warne-
fried and Alcuin.

The present system of punctuation
was introduced in the latter part of
the fifteenth century by Aldus Manu-
tius, a Venetian printer, who was
responsible for our full stop, colon,
semicolon, comma, marks of inter-
rogation and exclamation, parenthesis
and dash, hyphen, apostrophe and quo-
tation marks. These were subsequent-
ly copied by other printers, until their
use became universal.

Most ancient languages were inno-
cent of any system of punctuation. In
many early manuscripts the letters
are placed at equal distances apart,
with no connecting link between even
in the matter of spacing, an arrange-
ment which must have rendered read-
ing at sight somewhat difficult.

Liberty—Principle and Sentiment.
No theory is of much service in the
matter without a character responding
to the theory—without a feeling which
prompts the assertion of individual
freedom and is indignant against ag-
gressions on that freedom, whether
against self or others. Men care nothing
about a principle, even if they un-
derstand it, unless they have emotions
responding to it. When adequately
strong the appropriate emotion
prompts resistance to interference
with individual actions, whether by an
individual tyrant or by a tyrant major-
ity, but at present, in the absence of
the proper emotion, there exists al-
most everywhere the miserable super-
stition that the majority has a right to
dictate to the individual about every-
thing whatever.—By Herbert Spencer,
in letter to M. D. Conway.

HAS FINE HEAD FOR BUSINESS.

Woman's Methods That Aroused Won-
der and Admiration.

"If I had my wife's head and nerve
I'd own half of Wall street in less
than five years," said the man. "It
is the way she manages the clothes
proposition that aroused me to wonder
and admiration. Here is an example
of her thrift."

"Early last month she bought a
broadcloth dress which, with the ex-
tra charge for alterations, cost \$55.
Well, after she got the suit home she
didn't like it. The store objected at
first to taking it back, but her per-
suasive tongue won them over, and
after deducting \$5 for the alterations,
they refunded the money. Last week,
when musing around, she saw that
same suit on sale for \$35. My wife,
it seems, has such a peculiar figure
that the suit, after being made to fit
her wouldn't fit anybody else, so
there was that \$50 garment, and cheap
at the price, going for almost one-
third off. She of course snatched up
the bargain. No more fitting or mak-
ing over was necessary, so even when
counting in her \$5 for alterations,
she saved \$15 on the deal. I'd just
like you to show me any man who
could cor out that well on a trans-
action in clothes."

CUSTOM PUZZLED THE VISITOR.

Wedding Ring Arrangement That
Englishman Thought Queer.

"Of all your queer American cus-
toms," said the Englishman, "and you
have many, you know—oh, yes, very
many—the queerest is that of the old-
est daughter of the first marriage of
a woman who has been married twice
wearing her mother's first wedding
ring."

"How is that?" said the American
woman. "That sounds rather com-
plicated. I am afraid I didn't just
catch it."

The Englishman repeated.
"In the two weeks that I have been
in New York," he elucidated still
further, "I have met four maiden
ladies of 35 to 45 years of age who
wore wedding rings. I asked for an
explanation, and each time I found
that it was the ring with which the
lady's father married her mother.
When the mother married again she
gave the ring to her oldest daughter.
Don't you think that queer?"

"I certainly do," said the American
woman, "still I can't believe that it is
a national custom or I should have
heard of it before."—New York Press.

Lived Long as Hermit.

There has been discovered in the
Australian "bush" or forests a wild
Irishman, who had been leading a
hermit life for a quarter century. He
was of gigantic stature and enormous
strength—a good advertisement for
vegetarianism, as he had not touched
animal food since his retirement from
civilization. His hair was four feet
long, matted and of considerable thick-
ness. He told the police he was a fol-
lower of Christ, Samson and Her-
cules. His name is John Bernard
Fitzgerald and he is 72 years of age.
He has never bathed, regarding the
practice as irreligious and unnatural.
The combined force of half a dozen
police, however, compelled him to
overcome his scruples.

Paid for Bride by the Pound.

In the village of Kolked, in Hun-
gary, it has since time immemorial
been customary for the bridegroom to
give the bride's parents some com-
pensation before the wedding. The
other day a peasant farmer named
Kotvoos and the parents of his pretty
young betrothed could not come to
terms as to the amount, and so they
agreed to make the mayor arbitrator.
That good man, a cattle dealer, valued
the bride at 60 cents a pound. As she
weighed 88 pounds the happy bride-
groom had to pay only \$51.60, and
thought himself lucky to get a wife so
cheap.

Chemical Formulas.

In chemistry the elements are rep-
resented by accepted abbreviations,
called symbols, each of which indi-
cates a single atom of the element.
When more than one atom is to be
represented, figures are placed to the
right of the symbol either above or
below the line. A molecule represent-
ing a compound is indicated by a
series of such symbols called a for-
mula; thus alcohol has for its formula
C₂H₆O, which shows that a molecule
of this substance contains two atoms
of carbon, six of hydrogen and one of
oxygen.

Breaking the Rule.

"At our establishment," said the
merchant, "we are training our em-
ployees to say 'Good-morning,' or 'Good-
afternoon' at the telephone, instead of
'Hello.'"

"How does it work?"
"It works very well, indeed. Seems
to please our customers and gives the
establishment an air of dignity. The
only trouble we have is with me. I'm
the president, you know, and I forget.
There's nobody to jog my memory nor
call me down. Otherwise it works all
right."

The Value of Politeness.

Hollow trees are always the stiffest,
but the mightiest oak, it is found, can
bend. The more exalted a man is by
station, the more powerful should he
be by kindness. There is no policy
like politeness, since a good manner
often succeeds where the best tongue
has failed. Politeness is most useful
to inspire confidence in the timid and
encourage the desponding.—The Sunday
Strand.

Church Directory

Asbury Methodist Church.

Services first and third Sunday
mornings at 11 and Sunday evening,
also fourth Sunday evening of each
month.
Sunday school every Sunday 9:45
a. m. W. L. Roddie, superintendent.

Wanted.
One hundred children between the ages of two and ten to meet at the Baptist church at 9 a. m. every morning to take part in the Tom Thumb Wedding to be put on at the Airborne Friday night, June 18, benefit of Baptist Ladies Aid Parents please lend us the children. 11f

Sewer System for Madill.
Madill, Okla., June 12.—At a special meeting of the city council last night, called for that purpose a contract was entered into with S. D. Lipscomb, representing the Southwestern Engineering Co. of Oklahoma City, to establish grades for a large contract for sidewalk paving and for plans and specifications for a sewerage system costing not less than \$15,000.

Oil and Gas Tax.
Guthrie, Okla., June 12.—The state board of equalization held a session today to hear the oil and gas men with regard to the average 1000 percent raised in assessed valuations above returned valuation of the six smaller oil and gas pipe lines of the state. The board merely listened to the arguments and gave the pipeline men until next Saturday to produce supplementary reports

The assessing of the railroads of the state will be taken up by the board next week, very probably at a meeting called for Monday.

JOHN TARKENTON.
Dies Yesterday After Several Week's Illness.

John Tarkenton, aged 22 years died at the home of his brother W. T. Tarkenton in this city at 2:45 o'clock yesterday afternoon after an illness of several weeks. Mr. Tarkenton is the gentleman upon whom Dr. Brownall operated on several weeks ago and from whom he contracted blood poisoning causing his death.

The funeral and burial will take place at Bebee this afternoon.

Miss Barnard's Plans.
Guthrie, Ok., June 13.—Miss Kate Barnard, state commissioner of charities and corrections, now attending the national charities conference in Buffalo, will not return to Guthrie until the first of July. After the conference ends she will be the guest of Elbert Hubbard, publisher of the Philistine, at East Aurora, N. Y.

TARIFF BILL IN SENATE IN FINAL CONSIDERATION
MAY BE BROUGHT TO CLOSE BY NEXT FRIDAY.

Income Tax Amendments Will Then Be Taken Up and Vote May Be Reached.

Washington, June 13.—The feeling in all factions of the senate is that the tariff bill is approaching the last day of its consideration in the senate. Senator Aldrich is hopeful that the end may be reached by next Saturday, and many of the conservative republicans, as well as many of the democrats, are inclined to agree with the prediction. The progressive republicans are not quite so optimistic, but Senator Beveridge is of the opinion that the final vote will not be postponed beyond the end of next week.

The income tax amendments to the bill will be taken up Friday and a vote may be reached on the proposition the same day. It is possible that efforts may be made to secure a still further postponement of a vote.

This week will be devoted to a general cleaning up. With the exception of one disputed point in the silk schedule, the senate last week concluded its second consideration of the bill and disposed of all paragraphs of the schedule on which the committee had reported. Among the questions not acted upon in committee were many disputed points, but there will be an effort to clean them up rapidly, and it is believed comparatively little time will be taken on any of them. Among the more important provisions still to be considered are those pertaining to lumber wool pulp, print paper, hides coal, zinc, window glass, scrap iron, cotton ties, cotton bagging, leather goods, binding twine and petroleum.

Rough lumber remains on the dutiable list, but the question of amount of duty and the differential between the duty on rough lumber and on the manufactured article remains to be settled. In the paper schedule the principal items to be considered are the duty on ground wood and print paper. It seems probable ground wood or pulp will be left free, but the rate on paper will be made \$4 per ton instead of \$2, as fixed by the house, and \$6 as in the present law. This provision will be left open as long as possible, to permit Senator Hale, who has been absent when the subject comes up. He will stand out staunchly for a stiff duty on all of these articles.

Hides, coal and petroleum are giving the finance committee no little concern, but present indications are the senate will place a duty on all of these articles. Zinc, zinc ore and zinc in blocks, pigs and sheets and zinc paint products are still to be considered, as are sulphate of ammonia and barytes. Sulphate of ammonia is used in fertilizing, and farmers are making strenuous efforts to have it retained on the free list, where the house bill put it, while the manufacturers are contending for a duty. It now appears probable the farmers will win. Barytes is a Missouri product, and Missouri republicans are strongly urging an increase over the senate and house rates. The outcome is uncertain.

There is a demand for a reduction and reclassification of the window glass schedule, but any prediction as to what the result might be would be misleading. The same may be said of the contest between pig iron and scrap iron in the metal schedule. The house placed a duty of \$250 per ton on pig, but gave a scrap iron a duty of only 50c. The senate raised scrap to the same level with pig and the contest is between the rates of the two houses on these items. The Southern Senators, are making an earnest though probably, as it now appears, an unsuccessful effort to have cotton ties and cotton bagging made free of duty and the binding twine provision has been held up until the cotton tie question could be decided, probably on the theory the Northwestern senators could be prevailed upon to combine with the southern senators in the interest of the two articles together. The leather schedule, including leather, and leather goods, is suspended awaiting the decision on hides.

Among other important articles which remain undecided are pineapples, on which the Florida senators ask an increase.

Are They the Same Corporation or Are They Hitting the People?

The question of whether the Rock Island railroad and the Frisco railroad are one railroad or two, will be investigated by the corporation commission at Guthrie Tuesday of this week. At present freight rates are calculated on the basis of a two-road plan. The two roads control two-thirds of the railway mileage of the State of Oklahoma and if the corporation commission decides that the roads operate under a single management it will mean a decided reduction of freight rates, which will accrue to the profit of a large percentage of shippers in the state.

The two roads maintain business offices together in this and other cities and information is in the hands of the corporation commission that the two roads are in reality a unit corporation.

A. S. Wyly Reappointed.
Guthrie, Ok., June 12.—A. S. Wyly of Tahlequah has been reappointed as a member of the board of state normal regents, vice the resignation of W. W. Hastings of Tahlequah. Some time ago Mr. Wyly held the place but when elected as president of the Cherokee State Normal school at Tahlequah, resigned and Mr. Hastings was appointed. Then Mr. Wyly resigned the presidency to accept a position with the Cherokee schools, following which Mr. Hastings withdrew from the state normal board, and Mr. Wyly is back on the job according to an appointment filed by Gov. Haskell with the secretary of state today.

Second Half of 1908 Taxes.
Guthrie, Ok., June 13.—The second half of the 1908 taxes will be delinquent on June 15, but State Auditor Trapp believes County Commissioners have the authority to grant extensions if deemed by them necessary. Originally the taxes were delinquent on Jan. 15. Owing to excessive rates being applied in some counties the legislature extended the time ninety days. This period expires Tuesday, and in the meantime a number of the counties have reduced their levies.

Purcell in the Race.
Purcell, Okla., June 12.—At a large and enthusiastic mass meeting held at the court house this afternoon it was unanimously agreed by resolution that Purcell, the only aspirant in the old Indian Territory, should become a candidate for the location of the state capital. Committees were appointed to have charge of the financial and executive side of the campaign and work will begin at once.

ABOUT ADVERTISING—

The Dollar That Can't Be Spent

By Herbert Kaufman

Every dollar spent in advertising is not only a seed dollar which grows a profit for the merchant but is actually retained by him even after he has paid it to the publisher.

Advertising creates a gold will worth the cost of the publicity.

It actually costs nothing. While it uses funds it does not use them up. It helps the founder of a business to grow rich and at the same time keeps his business from not dying when he does.

It eliminates the personal equation. It perpetuates confidence in the store and makes it possible for a merchant to withdraw from business without having the profits of the business withdrawn from him. It changes a name to an institution—an institution that will survive after the death of its builder.

It is really an insurance policy which costs nothing—pays a premium each year instead of calling for one, and renders it possible to change the entire personnel of a business without disturbing its prosperity.

Advertising renders the business stronger than the man—independent of his presence. It permanentizes systems of merchandising, the track of which is left for others to follow.

A business which is not advertised must rely upon the personality of its proprietor, and personality in business is a decreasing factor. The public does not want to know the man who owns the store—it isn't interested in him, but in his goods. When an unadvertised business is sold it is only worth as much as its stock of goods and fixtures. There is no good will to be paid for—it does not exist—it has not been created. The name over the door means nothing except to the limited stream of people from the immediate neighborhood, any of whom could tell you more about some store ten miles away which has regularly delivered its shop news to their breakfast tables.

It is as shortsighted for a man to build a business which dies with his death or ceases with his inaction as it is unfair for him not to provide for the continuance of its income to his family.

MACK LEE CASE TO A CLOSE

TAKING OF TESTIMONY CLOSSES AT 2:30 TODAY.

SEVEN LAWYERS TO SPEAK

Final Finish to Come This Afternoon and Tonight When Attorneys Have the Floor.

The case of Mack Lee, charged with the murder of Marshal Zeke Putman at Allen on the night of February 16th, this year, will be closed when the attorneys have delivered their argument to the jury. The taking of testimony closed at 2:30, and at 3:30 the argument was begun. The forenoon today was consumed in taking evidence to ascertain whether or not Mack Lee was in Centrahoma making a land deal on the 23rd day of February, as he had testified. The register of the Stewart hotel at Oklahoma City was introduced by the hotel clerk and showed that Lee had registered at Oklahoma City on the evening of the 23rd and had left on the following day. The point was raised by reason of a contract which was introduced by the defense and which was supposed to have been executed at Centrahoma, controverting certain evidence of John Scribner. This point was the bone of contention from early this morning until the taking of testimony was closed.

Several character witnesses have been introduced, many of whom discredited the character of Lee's witnesses. Character witnesses for Lee give him a good name and vouch for his standing in the community where he lives.

This has been a long, hard fought case, and one which the public has watched with much interest. The people will await the verdict of the jury with the same earnestness which has characterized their attention from the beginning of the trial.

RESTRAINING ORDERS GRANTED.

Federal Judge of McAlester Acts in Railroad Tax Suits Against State of Oklahoma.

McAlester, Ok., June 12.—The Missouri, Kansas and Texas, the Gulf, Colorado and Santa Fe, the Atchison, Topeka and Santa Fe, the Fort Smith and Western and the Midland Valley railroad companies today filed thirty suits in the Federal court for the Eastern District of Oklahoma against county treasurers and sheriffs in nearly as many counties, seeking to restrain them from collecting taxes claimed to be illegally assessed against the railway companies. Unequal taxation is the chief ground alleged, and the constitutionality of the acts creating the Board of Assessors and the Board of Equalization is questioned. Judge Ralph E. Campbell this evening granted temporary restraining orders in all the cases.

WIFE SLAYER IS KILLED BY POSSE

CLAREMORE MAN PAYS QUICK PENALTY FOR MURDER.

Kills His Wife and Meets Death Himself Within Thirty Minutes.

Claremore, Okla., June 12.—Henry Mosley, night watchman of the police force at Claremore, tonight at 7:30 killed his wife and was himself killed a half hour later by a posse of officers whom he resisted on the highway in attempting to escape. Mrs. Mosley was shot twice, the first ball entering her heart and killing her instantly. The second entered the stomach.

Mosley, goaded by family troubles that had led some time ago to a separation, came home early this evening and finding his wife away, went to town and brought her home. The shooting occurred in the front yard. Sheriff Stephens and two deputies overtook Mosley a half mile north of town. Mosley turned upon them and opened fire which the posse returned. Mosley was killed instantly by one of the posse.

Mosley was 40 years old and had been here for 20 years. There are three children in the family, the eldest 16 years old.

IN MATTER OF LICENSE.

Some Misunderstanding Which Should Be Corrected.

Since the case of Mr. Lingenfelter was discussed in the newspapers several days ago a general misunderstanding among the farmers has been created. Several of them, in fact, have gone so far as to consult the city clerk as to whether or not they could sell their products on the streets of Ada without paying a license. The ordinance which provides that a license shall be paid by peddlers or hawkers applies only to persons who purchase wares and peddle them for a profit but not to a man who raises his products and disposes of them on the streets. A farmer, or any other person for that matter, can dispose of anything he produces to suit himself and there is no revenue charge attached, but a man who buys products from other producers and peddles them for profit, thereby making it a business is subject to the license.

To say that the producer cannot dispose of his products without paying for the privilege would be extremely unjust and such is not the intention of the ordinance, neither does such custom prevail.

Court Action Delayed.

Guthrie, Ok., June 12.—No action will be taken in the courts against the state board of affairs as contemplated by Superintendent Cameron of the board of normal school regents, until after the latter board has a meeting now called for June 15. At that time the question of testing the authority of the State board of affairs will be determined. The controversy grows out of the board's refusal to approve an estimate for about \$15,000 alleged to be due contractors working on the Weatherford school buildings. Members of the board of affairs say they do not know that a contract for the work has been made.

A Beautiful Thought.

The following sentiment is from the pen of Bob Taylor: "I would rather fill my purse with money and keep its coins ajar to my happy girls while yet they linger under my roof than to clutch it with a miser's hand until all the harp-strings of youth are broken and its music forever fled. I would rather spend my last nickel for a bag of stripped marbles to gladden the hearts of my barefooted boys than to deny them their childish pleasures, and leave them a bag of gold to quarrel over when I am dead. I abhor the pitiless hawk that circles in the air only to swoop down and strangle the song of the linnets or bury its talons in the heart of the dove. I despise the soulless man whose greed for gold impels him to strangle the laughter and song of his own family."

BRIGHT PROSPECTS FOR OKLAHOMA

OUR MOST IMPORTANT INDUSTRY TAKES FAVORABLE TURN.

OIL DEVELOPMENT IS GREAT

A Pipe Line From Oklahoma to the Gulf Will Make Greater Things Possible.

Guthrie, Ok., June 12.—Many things have occurred in Oklahoma during the past few weeks to make brighter conditions in the various oil fields of the state. There are definite and certain reports that the Standard Oil Company will, within thirty days, begin the construction of its pipe line from Oklahoma to the Gulf, via the Caddo oil field in Louisiana. It is also reported, seemingly accurately, that the Prairie Oil and Gas company will domesticate and put an end to all controversy between that company and the state administration. The visit of the Standard Oil officials, including John D. Rockefeller, Jr., and various other New York, Pittsburg and Ohio capitalists, and their inspection of the Mid-Continent field are also taken as a good sign by Oklahoma producers. The decided announcement that the pipe line will be built to the Gulf followed the visit of these officials. The producers are very anxious that the secretary of the interior, at Washington, yield to the request of the Standard company to make easier the construction of their line across Indian lands.

If the construction is commenced within thirty days, as announced, it is believed that a pipe line to the gulf will be completed within six months. Many of the producers see in this new line an increase in prices for crude oil, while others will be satisfied to have old prices remain and all oil taken by pipe lines as fast as produced. The producers hope the new line will settle the question to their benefit relative to the alleged discrimination against Oklahoma in the market price for crude oil. Producers maintain that the Oklahoma product is of a better grade than the Illinois or Pennsylvania because of the freshness of it, but that it sells for a much lower price.

Want Water Transportation.

The producers of the Mid-Continent field, in particular, are agitating the opening of the Arkansas River for navigation. This has been urged by the Commercial clubs of Muskogee, Tulsa, Sapulpa and Bartlesville, as well as other cities along the Arkansas River, for several years, but not until recently have the oil operators interested themselves. They claim that if the oil products of Oklahoma can be shipped to the sea at a small cost that the day of 41c oil will be over. Engineers who have examined the Arkansas river, say that it would cost less than \$5,000,000 to make it navigable as far as the Mississippi by a system of locks and dams. Engineer William Parkins, who recently made an examination of the bed of the Arkansas, states that it will not be nearly as difficult as the task was to make the Ohio navigable.

In connection with the manner of oil transportation comes the announcement of the Midland Valley Railroad that about July 25 it will inaugurate a reduced rate for the transportation of crude oil from all Midland Valley landing points to the different points of consumption in Texas. This will permit the Muskogee and Glenn oil fields to compete successfully with oil companies in the Texas fields. The proposed reduction contemplates a 20c rate in place of the 27c schedule; 18c for the 22c rate, and 15c for the 20c rate, making a total reduction of at least 20 per cent in the existing schedule.

Increases Crude Oil Prices.

The Texas Pipe Line Company has posted a notice to the effect that beginning immediately it will pay 22c for oil instead of 30c. Just what the company means by this rate is a matter of conjecture among producers. By some it is believed that the company is starting a fight on its competitors, and the producers are hop-

ing such is the case. On the other hand it is maintained that the Texas company can handle more oil than it is now getting, and makes a raise in price to encourage runs. Neither the Gulf Pipe Line company have announced any increase. Both, however, have been paying more than the Texas company until the latter's recent increase.

Many producers believe that the next few months will prove the best in the history of the Mid-Continent oil field. The tendency is still to curtail productions and not much drilling is being done in proportion to what might be done. Many deals are pending and many of these involve more land than has changed hands in one lump for a long time. There are many buyers in the field.

The Yeager-Strain bill, enacted by the recent Oklahoma Legislature, is operating to the benefit of the producers in many ways. The days when offset wells could be drilled around a good lease, forcing the lessee to drill in order to hold his title and not forfeit the lease, seem to be past. The producer is not subject to this particular method of phoning any more. The action of the Interior Department in relinquishing supervision over thousands of acres of good oil lands, owned by Indians, has also made better oil conditions. Every act that does away with government red tape tends to push things for the producer. It is no longer necessary, in numerous instances, to tie up large sums in escrow for an indefinite period while Indian agents and the department at Washington go into the details of every deal to determine whether or not a lease or an assignment should be approved.

New Wells Being Drilled.

In spite of the general feeling that produce should be curtailed every time a new pool is opened the tools get busy. Numerous wells have been drilled in North Tulsa or Flat Rock pool, but recently the Muskogee field is attracting the most attention in Central Oklahoma. A new streak, or a continuation in the sand from the Muskogee field, has just been discovered and by far the best wells in the Muskogee fields have been brought in during the past few weeks. One of the new wells drilled recently had an initial production of 12,000 barrels daily. The oil was discovered at a depth of 1,035 feet and upon discovery rushed to the top of the derrick. Some good prices have been paid in the Muskogee field for oil leases.

The citizens of Henryetta are jubilant over the bringing in of a 200 barrel well and much prospecting is being done. A well has also been brought in near Butler by John Wallace, a new comer, in the mid-continent field. The well is five miles from any other producer and is a "wild-cat" of the extreme kind. The usual scramble for oil leases followed the discovery. A 400-barrel well was also brought in recently in the Morrison field. The land on which it was discovered was exceptionally valuable at one time, but was abandoned by reason of a dry hole being drilled.

The Matson Oil Company during the week disposed of its one-half interest in holdings in the Osage Nation to William McBride. Eleven wells have been drilled on this eleven hundred acres, all of them strong producers, starting at 1,600 to 2,000 barrels daily and still producing a lot of oil. One well is still producing over seven hundred barrels a day. Within twenty months 1,200,000 barrels have been run from this lease. The Cudahy Oil company completed two wells near Bartlesville, both of them producers.

F. G. Pettibone, vice-president and general manager of the Santa Fe railroad, announced that twenty additional wells will be put down in the Wheeler field near Ardmore as fast as men and rigs can do the work, working night and day. As soon as the production has reached 1,000 barrels daily a pipe line or a railroad will be built to the field. The production now is 750 barrels daily. He also stated that the supply of natural gas from wells now in the Wheeler field is flowing freely and that all the gas necessary was being produced.

An attempt is being made on the "101 Ranch" in Northern Oklahoma to strike oil or gas, the driller now being at a depth of 1,600 feet with

MEN OR YOUNG MEN Who Put Their confidence in us in this matter of clothes are entitled to know the truth about what they buy here; and we're glad to have them know it; there's nothing here that we're afraid to tell the truth about.

Hart Schaffner & Marx clothes are all-wool; and all-wool is the only real, full value in clothes. We have some clothes that are not all-wool; we'll tell you so if you select any of them. We don't advise you to buy cotton-mixed goods; they're mostly disappointing, and that's bad for us as well as you. We have them here to sell to men or the young men who are not yet wise enough to insist on all-wool.

We'll try to persuade you to buy Hart Schaffner & Marx all-wool clothes; they'll cost more because they're worth more.

Special Cut Prices on Suits

indications of gas. They expect to go down until they reach the depth drilled in the Bartlesville and Pawhuska fields. Additional drilling is also in progress near Madill and Ada in Southern Oklahoma.

INITIATIVE AND REFERENDUM.

If Election Law Went Into Effect on Approval, New Petitions Will Be Necessary.

Guthrie, Ok., June 12.—The Attorney General has been asked for an opinion as to whether the general election law enacted by the last legislature, and embodying the ribbon ballot idea of other states, is carrying into effect provisions of the initiative and referendum. The republican state organization secured petitions against the election law, filing 27,812 names on May 29 and 3,239 on June 10. Only between 12,000 and 13,000 were necessary to have the law referred to the people for decision by ballot. If the law is con-

sidered as carrying into effect provisions of the initiative and referendum, as has been claimed, then, by the terms of the constitution, it was probably in effect the day it was approved by the governor. The constitution provides that such laws do not require the emergency clause to give them immediate application. Should the ruling be sustained the opposing organization would be forced to initiate a law repealing the ribbon ballot act, as the referendum petitions would be, it is held, of no effect.

John Scribner Injured.

As one of the officers at the jail was closing a cage door this morning John Scribner, one of the prisoners, had his hand caught between the door and the jam and fearfully mashed. While one or two bones are fractured it is not thought that the injury will result seriously.

WITH OUR EXCHANGES

When the law permits the doping
of food and forbids the poisoning of
whiskey. It's enough to drive a man
to drink.—Baxter Citizen

A patent medicine advertisement
is headed: "Don't read this if you are
worth \$50,000." We are willing to
admit that that sort of advertising
doesn't pay.—Konawa Chief-Leader

It is getting to be dangerous for
a man named John Hopkins to live in
Oklahoma. The state has hung one
man of that name, and now has sen-
tenced another to the same fate.—
Frederick Leader.

The El Reno American speaks of
Oklahoma City reaping the whirl-
wind. There are lots of good peo-
ple who would be glad to act as bur-
vest hands reaping the sort of whirl-
wind Oklahoma City has reaped to
date.—McAlister News-Capital

Recent happenings at Washington
have opened the eyes of both demo-
crats and republicans to the fact that
this country needs must rid itself of
a bunch of old nesters who are not
statesmen but spoliemen, not pa-
triotic but tools of capitalistic inter-
ests.—Oklahoman.

If there is one thing more annoy-
ing and more conducive to uncharit-
able thought than having a pestifer-
ous fly conceive a fondness for one's
bald spot, it is to lay one's new five
dollar straw upon an innocent sheet
of tanglefoot.—Muskogee Phoenix.

According to dispatches from Guth-
rie representatives of the State who
have the exclusive sale of whiskey
in this State have started out in a
tour of the counties in an effort to
run down the competitors of the
state dispensary joints and to orga-
nize civic leagues to assist in the
teaching of the virtues of Sunny
Brook as a sure cure for snake bites,
seven year itch, malaria, rheuma-
tism and other various diseases. Ver-
ily, the world do move and the "pee-
poo" rule.—Wapamucka Press.

A newspaper can never very cred-
itably represent a town whose busi-
ness men do not advertise. He may
howl himself hoarse bragging about
the vim, energy and enterprise of
town, but if his declarations are not
backed up by a liberal amount of
advertising by the business men of
the town, the world will be slow to
take his statement as true. It takes
more than the unsupported testimony
of the local newspaper man to prove
to the world that his town is the
financial center, the business center,
the best market, and the best place
on earth to buy goods; his evidence
needs corroboration.—Exchange.

"Aha!" may Purcell now exclaim, as
did the Indians when Columbus first
landed in America "at last we are
discovered!" The Oklahoman, after

having received the newspapers from
Purcell for several weeks, after no-
tices of meetings in the interests
of the capital location matter had
been more than once sent by its local
correspondent, suddenly finds that
Purcell is in the race, and hands us
out a line of talk, something after the
fashion in which one may imagine
Goliath commented upon the ap-
pearance of the little shepherd boy
upon the scene. But Goliath's size
didn't save him, and this modern pro-
totype of the shepherd by has a
quiver well supplied with pebbles for
his sling.—Purcell Register.

The Kansas City Star, in an arti-
cle on the renowned Missouri mule,
pays the faithful animal some hand-
some compliments. "The 'fool mule'
of the comic paper is not such a fool
after all," said the Star. "He takes
care of himself, and the barn man of
any big teaming company will tell
you a pair of mules will outlast two
or three pairs of horses at hard
work. A mule could give an athlete
points on training. He will not over-
eat or over-drink. After hard work
he will not eat or drink until rested.
He seems to know that he cost
his owner no small sum, and will not
allow a careless driver to over-work
him. He is not of a nervous tempera-
ment, and loses no energy worrying
as the horse does. To the diseases
that attack the horse in the south
he is immune. Everything considered,
the demand for the mule is a just
tribute to his usefulness. Missourians
should have a proper pride in the
Missouri mule, the ideal beast of
draft and burden for the South."—
Muskogee Times-Democrat.

To My Friends.
I desire to thank our many friends
who have assisted us during the ill-
ness and death of our son and brother,
and to state that I will resume
my business about Wednesday of this
week.—W. T. Tarkenton.

Two More Weeks.

Our trimmer, Miss Adams, will be
with us this season. We still have a
beautiful line of the latest styles
in shapes and trimmings which we
will not carry over, and will cut
the prices that any one will be able
to buy a fine hat for a little
of nothing. We have one lot \$2.00 and
\$1.50 hats your choice 35c each. Miss
Adams will be glad to give you good
bargains in hats before she leaves
Ada. Come to see her at the Grand
Leader

Beware of Ointments for Catarrh
that Contain Mercury.
as mercury will surely destroy the
sense of smell and completely de-
range the whole system when enter-
ing it through the mucous surfaces.
Such articles should never be used
except on prescriptions from reput-
able physicians, as the damage they
will do is ten fold to the good you
can possibly derive from them. Hall's
Catarrh Cure, manufactured by F. J.
Cheney & Co., Toledo O., contains no
mercury, and is taken internally, act-
ing directly upon the blood and mucous
surfaces of the system. In buying
Hall's Catarrh Cure be sure you get
the genuine. It is taken internally
and made in Toledo, Ohio, by F. J.
Cheney & Co. Testimonials free.
Sold by Druggists. Price 75c per
bottle.
Take Hall's Family Pills for con-
stipation. 47-dwimo

AROUND THE HOUSE

CHAT ON MATTERS OF MORE OR
LESS IMPORTANCE.

Useful Duster Devised from Worn-Out
Garment—Simple Method of
Marking Linen Before
Sending to Laundry.

Dusters.—There is nothing that can
be used to dust with that can equal
the lower portion of a gauze under-
vest. Wet in warm water and wrung
out tight, it will take up every particle
of dust, and then, as it is rinsed, one
feels sure of actually getting rid of so-
much dirt. Twenty years of dusting
highly finished furniture with a soft,
damp woven dust cloth has not dimmed
its luster.

Old Sheets.—When sheets wear out
past recovery, tear out the center or
worn part, sew up in a double seam,
thus hiding the edges, and sew one
two or three brass rings as needed on
to one end. Use this to hang over
nice dresses in the closets. If too
long, cut a piece off from the bottom
and use to cover the sleeve board, or,
if of good quality, this piece would
make a pillow case.

Stockings.—All stockings should be
marked so as to mate. Initials can be
worked in long outlining stitches with
either white thread or different col-
ored silks for different members of the
family. Use the Roman numerals with
one long stitch for each line to make
them. This sort of marking takes but
a few moments as soon as the stock-
ings are bought, and saves much time
in sorting and gives general satis-
faction in the household.

For Safety.—One mother with sev-
eral daughters has hit upon a good
plan to protect her right of owner-
ship. Each week when preparing
clothes for the Monday wash she
takes a needle with white thread and
runs a stitch through one corner of
each of her own handkerchiefs, also
each stocking. The maid is instructed
to dampen the handkerchiefs and
break the thread only when ready to
iron them and see that they are
placed on her bureau. The same in-
structions are given in regard to the
stockings.

Lace Curtains.—All lace curtains
should be soaked for a least an hour
in cold water in which a little borax
has been dissolved before putting them
into warm suds. This takes out the
smoky odor and softens the dirt.

Ice Pick.—Always remember that
if the ice pick is lost or misplaced for
the time being, an ordinary hat pin
gradually forced into ice will produce
a crack and separate the ice without a
sound. Nurses in hospitals use needles
and even common pins to crack ice for
patients.

Shoes Blacked.—There is no reason
why young or old should be careless
about having their footwear kept in
proper condition. A lamb's wool glove
and dauber can be bought for ten
cents and a box of blacking for an-
other dime. By being careful to never
use but one side of the dauber there
will be no need of soiling the fingers,
and the wool glove gives a fine polish
with very little effort.

Furniture Polish.—All outlay of en-
ergy required in polishing furniture
after the fall cleaning is well repaid
in the appreciation shown by every
member of the family. A well tested
polish is made of one part benzine,
one part linseed oil and two parts tur-
pentine. Use two cloths, one to rub
on the liquid and the other for polish-
ing.

Aldus Manutius Author of System of
Punctuation.

Punctuation by means of stops and
points, so as to indicate the mean-
ing of sentences and assist the reader
to a proper enunciation, is ascribed
originally to Aristophanes, a gram-
marian of Alexandria, Egypt, who
lived in the third century B. C. What-
ever his system may have been, it
was subsequently neglected and for-
gotten, but was reintroduced by
Charlemagne, the various stops and
symbols being designed by Warne-
fried and Alcuin.

The present system of punctuation
was introduced in the latter part of
the fifteenth century by Aldus Manu-
tius, a Venetian printer, who was re-
sponsible for our full stop, colon,
semicolon, comma, marks of inter-
rogation and exclamation, parenthesis
and dash, hyphen, apostrophe and quo-
tation marks. These were subsequent-
ly copied by other printers, until their
use became universal.

Most ancient languages were inno-
cent of any system of punctuation. In
many early manuscripts the letters
are placed at equal distances apart,
with no connecting link between even
in the matter of spacing, an arrange-
ment which must have rendered read-
ing at sight somewhat difficult.

Liberty—Principle and Sentiment.
No theory is of much service in the
matter without a character responding
to the theory—without a feeling which
prompts the assertion of individual
freedom and is indignant against ag-
gressions on that freedom, whether
against self or others. Men care nothing
about a principle, even if they un-
derstand it, unless they have emotions
responding to it. When adequately
strong the appropriate emotion
prompts resistance to interference
with individual actions, whether by an
individual tyrant or by a tyrant major-
ity; but at present, in the absence of
the proper emotion, there exists al-
most everywhere the miserable super-
stition that the majority has a right to
dictate to the individual about every-
thing whatever.—By Herbert Spencer,
in letter to M. D. Conway.

HAS FINE HEAD FOR BUSINESS.

Woman's Methods That Aroused Won-
der and Admiration.

"If I had my wife's head and nerve
I'd own half of Wall street in less
than five years," said the man. "It
is the way she manages the clothes
proposition that aroused me to wonder
and admiration. Here is an example
of her thrift."

"Early last month she bought a
broadcloth dress which, with the ex-
tra charge for alterations, cost \$55.
Well, after she got the suit home she
didn't like it. The store objected at
first to taking it back, but her per-
suasive tongue won them over, and
after deducting \$5 for the alterations,
they refunded the money. Last week,
when nosing around, she saw that
same suit on sale for \$35. My wife,
it seems, has such a peculiar figure
that the suit, after being made to fit
her wouldn't fit anybody else, so
there was that \$50 garment, and cheap
at the price, going for almost one-
third off. She of course snatched up
the bargain. No more fitting or mak-
ing over was necessary, so even when
counting in her \$5 for alterations,
she saved \$15 on the deal. I'd just
like you to show me any man who
could cor out that well on a trans-
action in clothes."

CUSTOM PUZZLED THE VISITOR.

Wedding Ring Arrangement That
Englishman Thought Queer.

"Of all your queer American cus-
toms," said the Englishman, "and you
have many, you know—oh, yes, very
many—the queerest is that of the old-
est daughter of the first marriage of
a woman who has been married twice
wearing her mother's first wedding
ring."

"How is that?" said the American
woman. "That sounds rather com-
plicated. I am afraid I didn't just
catch it."

"The Englishman repeated.
"In the two weeks that I have been
in New York," he elucidated still
further, "I have met four maiden
ladies of 35 to 45 years of age who
wore wedding rings. I asked for an
explanation, and each time I found
that it was the ring with which the
lady's father married her mother.
When the mother married again she
gave the ring to her oldest daughter.
Don't you think that queer?"

Lived Long as Hermit.

There has been discovered in the
Australian "bush" or forests a wild
Irishman, who had been leading a
hermit life for a quarter century. He
was of gigantic stature and enormous
strength—a good advertisement for
vegetarianism, as he had not touched
animal food since his retirement from
civilization. His hair was four feet
long, matted and of considerable thick-
ness. He told the police he was a fol-
lower of Christ, Samson and Her-
cules. His name is John Bernard
Fitzgerald and he is 72 years of age.
He has never bathed, regarding the
practice as irreligious and unnatural.
The combined force of half a dozen
police, however, compelled him to
overcome his scruples.

Paid for Bride by the Pound.

In the village of Kolked, in Hun-
gary, it has since time immemorial
been customary for the bridegroom to
give the bride's parents some com-
pensation before the wedding. The
other day a peasant farmer named
Kotvoes and the parents of his pretty
young betrothed could not come to
terms as to the amount, and so they
agreed to make the mayor arbitrator.
That good man, a cattle dealer, valued
the bride at 80 cents a pound. As she
weighed 86 pounds the happy bride-
groom had to pay only \$51.60, and
thought himself lucky to get a wife so
cheap.

Chemical Formulas.

In chemistry the elements are rep-
resented by accepted abbreviations,
called symbols, each of which indi-
cates a single atom of the element.
When more than one atom is to be
represented, figures are placed to the
right of the symbol either above or
below the line. A molecule represent-
ing a compound is indicated by a
series of such symbols called a for-
mula; thus alcohol has for its formula
C2H5O, which shows that a molecule
of this substance contains two atoms
of carbon, six of hydrogen and one of
oxygen.

Breaking the Rule.

"At our establishment," said the
merchant, "we are training our em-
ployees to say 'Good-morning,' or 'Good-
afternoon' at the telephone, instead of
'Hello.'"

"How does it work?"
"It works very well, indeed. Seems
to please our customers and gives the
establishment an air of dignity. The
only trouble we have is with me. I'm
the president, you know, and I forget.
There's nobody to jog my memory nor
call me down. Otherwise it works all
right."

The Value of Politeness.

Hollow trees are always the stiffest,
but the mightiest oak, it is found, can
bend. The more exalted a man is by
station, the more powerful should he
be by kindness. There is no policy
like politeness, since a good manner
often succeeds where the best tongue
has failed. Politeness is most useful
to inspire confidence in the timid and
encourage the deservng.—The Sunday
Strand.

Church Directory

Asbury Methodist Church.
Services first and third Sunday
mornings at 11 and Sunday evening,
also fourth Sunday evening of each
month.
Sunday school every Sunday 9:45
a. m., W. L. Roddie, superintendent.

J. W. Rushton of Stonewall was an Ada visitor Sunday.

John Gardner returned from Sherman, Tex., Sunday afternoon.

H. A. Kroeger of Francis, was transacting business in Ada today.

Misses Anna Conder, Chloe Roff and Clara Good spent Sunday in Roff.

Everything good to eat. Phone. 55. 66-1f

R. H. Gambrell of Sasakwa was transacting business in Ada, Saturday afternoon.

Tod Warden, a veteran policeman and secret service man of Oklahoma City, is in the city today.

The big ditcher is in fine trim and the work on the sewerage contract is progressing rapidly.

Rev. W. H. Wilson and family left this morning for a several weeks visit with relatives in Arkansas.

Mr. and Mrs. Uno. F. Tinsin who have been the guests of Mr. and Mrs. W. S. Creveling returned to their home in Denison this morning.

Mr. B. H. Mason who is to be the president of the First State Bank at Ford City, went to Kansas City, Sunday to look at bank furniture and fixtures and to look after some other financial matters.

Wanted.
One hundred children between the ages of two and ten to meet at the Baptist church at 9 a. m. every morning to take part in the Tom Thumb Wedding to be put on at the Airdome Friday night, June 18, benefit of Baptist Ladies' Aid. Parents please lend us the children. 113

Sewer System for Madill.
Madill, Okla., June 12.—At a special meeting of the city council last night, called for that purpose a contract was entered into with S. D. Lipscomb, representing the Southwestern Engineering Co. of Oklahoma City, to establish grades for a large contract for sidewalk paving and for plans and specifications for a sewerage system costing not less than \$15,000.

Oil and Gas Tax.
Guthrie, Okla., June 12.—The state board of equalization held a session today to hear the oil and gas men with regard to the average 1000 percent raised in assessed valuations above returned valuation of the six smaller oil and gas pipe lines of the state. The board merely listened to the arguments and gave the pipe line men until next Saturday to produce supplementary reports.

The assessing of the railroads of the state will be taken up by the board next week, very probably at a meeting called for Monday.

JOHN TARKENTON.

Dies Yesterday After Several Week's Illness.

John Tarkenton, aged 32 years died at the home of his brother W. T. Tarkenton in this city at 2:45 o'clock yesterday afternoon after an illness of several weeks. Mr. Tarkenton is the gentleman upon whom Dr. Brownall operated on several weeks ago and from whom he contracted blood poisoning causing his death.

The funeral and burial will take place at Bebee this afternoon.

Miss Barnard's Plans.

Guthrie, Ok., June 13.—Miss Kate Barnard, state commissioner of charities and corrections, now attending the national charities conference in Buffalo, will not return to Guthrie until the first of July. After the conference ends she will be the guest of Elbert Hubbard, publisher of the Philistine, at East Aurora, N. Y.

Income Tax Amendments Will Then Be Taken Up and Vote May Be Reached.

Washington, June 13.—The feeling in all factions of the senate is that the tariff bill is approaching the last day's of its consideration in the senate. Senator Aldrich is hopeful that the end may be reached by next Saturday, and many of the conservative republicans, as well as many of the democrats, are inclined to agree with the prediction. The progressive republicans are not quite so optimistic, but Senator Beveridge is of the opinion that the final vote will not be postponed beyond the end of next week.

The income tax amendments to the bill will be taken up Friday and a vote may be reached on the proposition the same day. It is possible that efforts may be made to secure a still further postponement of a vote.

This week will be devoted to a general cleaning up. With the exception of one disputed point in the silk schedule, the senate last week concluded its second consideration of the bill and disposed of all paragraphs of the schedule on which the committee had reported. Among the questions not acted upon in committee were many disputed points, but there will be an effort to clean them up rapidly, and it is believed comparatively little time will be taken on any of them. Among the more important provisions still to be considered are those pertaining to lumber wool pulp, print paper, hides, coal, zinc, window glass, scrap iron, cotton ties, cotton bagging, leather goods, binding twine and petroleum.

Rought lumber remains on the dutiable list, but the question of amount of duty and the differential between the duty on rough lumber and on the manufactured article remains to be settled. In the paper schedule the principal items to be considered are the duty on ground wood and print paper. It seems probable ground wood or pulp will be left free, but the rate on paper will be made \$4 per ton instead of \$2, as fixed by the house, and \$6 as in the present law. This provision will be left open as long as possible, to permit Senator Hale, who has been absent when the subject comes up. He will stand out staunchly for a stiff duty on all of these articles.

Hides, coal and petroleum are giving the finance committee no little concern, but present indications are the senate will place a duty on all of these articles. Zinc, zinc ore and zinc in blocks, pigs and sheets, and zinc paint products are still to be considered, as are sulphate of ammonia and barytes. Sulphate of ammonia is used in fertilizing, and farmers are making strenuous efforts to have it retained on the free list, where the house bill put it, while the manufacturers are contending for a duty. It now appears probable the farmers will win. Barytes is a Missouri product, and Missouri republicans are strongly urging an increase over the senate and house rates. The outcome is uncertain.

There is a demand for a reduction and reclassification of the window glass schedule, but any prediction as to what the result might be would be misleading. The same may be said of the contest between pig iron and scrap iron in the metal schedule. The house placed a duty of \$2.50 per ton on pig, but gave a scrap from a duty of only 50c. The senate raised scrap to the same level with pig and the contest is between the rates of the two houses on these items. The Southern Senators are making an earnest though probably, as it now appears, an unsuccessful effort to have cotton ties and cotton bagging made free of duty and the binding twine provision has been held up until the cotton tie question could be decided, probably on the theory the Northwestern senators could be prevailed upon to combine with the southern senators in the interest of the two articles together. The leather schedule, including leather, and leather goods, is suspended awaiting the decision on hides.

Among other important articles which remain undecided are pineapples, on which the Florida senators ask an increase.

Miss Barnard's Plans.

Guthrie, Ok., June 13.—Miss Kate Barnard, state commissioner of charities and corrections, now attending the national charities conference in Buffalo, will not return to Guthrie until the first of July. After the conference ends she will be the guest of Elbert Hubbard, publisher of the Philistine, at East Aurora, N. Y.

TARIFF BILL IN SENATE IN FINAL CONSIDERATION

MAY BE BROUGHT TO CLOSE BY NEXT FRIDAY.

Income Tax Amendments Will Then Be Taken Up and Vote May Be Reached.

Washington, June 13.—The feeling in all factions of the senate is that the tariff bill is approaching the last day's of its consideration in the senate. Senator Aldrich is hopeful that the end may be reached by next Saturday, and many of the conservative republicans, as well as many of the democrats, are inclined to agree with the prediction. The progressive republicans are not quite so optimistic, but Senator Beveridge is of the opinion that the final vote will not be postponed beyond the end of next week.

The income tax amendments to the bill will be taken up Friday and a vote may be reached on the proposition the same day. It is possible that efforts may be made to secure a still further postponement of a vote.

This week will be devoted to a general cleaning up. With the exception of one disputed point in the silk schedule, the senate last week concluded its second consideration of the bill and disposed of all paragraphs of the schedule on which the committee had reported. Among the questions not acted upon in committee were many disputed points, but there will be an effort to clean them up rapidly, and it is believed comparatively little time will be taken on any of them. Among the more important provisions still to be considered are those pertaining to lumber wool pulp, print paper, hides, coal, zinc, window glass, scrap iron, cotton ties, cotton bagging, leather goods, binding twine and petroleum.

ROCK ISLAND AND FRISCO.

Are They the Same Corporation or Are They Biting the People?

The question of whether the Rock Island railroad and the Frisco railroad are one railroad or two, will be investigated by the corporation commission at Guthrie Tuesday of this week. At present freight rates are calculated on the basis of a two-road plan. The two roads control two-thirds of the railway mileage of the State of Oklahoma and if the corporation commission decides that the roads operate under a single management it will mean a decided reduction of freight rates, which will accrue to the profit of a large percentage of shippers in the state.

The two roads maintain business offices together in this and other cities and information is in the hands of the corporation commission that the two roads are in reality a unit corporation.

A. S. Wyly Reappointed.

Guthrie, Ok., June 12.—A. S. Wyly of Tahlequah has been reappointed as a member of the board of state normal regents, vice the resignation of W. W. Hastings of Tahlequah. Some time ago Mr. Wyly held the place but when elected as president of the Cherokee State Normal school at Tahlequah, resigned and Mr. Hastings was appointed. Then Mr. Wyly resigned the presidency to accept a position with the Cherokee schools, following which Mr. Hastings withdrew from the state normal board, and Mr. Wyly is back on the job according to an appointment filed by Gov. Haskell with the secretary of state today.

Second Half of 1908 Taxes.

Guthrie, Ok., June 13.—The second half of the 1908 taxes will be delinquent on June 15, but State Auditor Trapp believes County Commissioners have the authority to grant extensions if deemed by them necessary. Originally the taxes were delinquent on Jan. 15. Owing to excessive rates being applied in some counties the legislature extended the time ninety days. This period expires Tuesday, and in the meantime a number of the counties have reduced their levies.

Purcell in the Race.

Purcell, Okla., June 12.—At a large and enthusiastic mass meeting held at the court house this afternoon it was unanimously agreed by resolution that Purcell, the only aspirant in the old Indian Territory, should become a candidate for the location of the state capital. Committees were appointed to have charge of the financial and executive side of the campaign and work will begin at once.

ABOUT ADVERTISING—

The Dollar That Can't Be Spent

By Herbert Kaufman

Every dollar spent in advertising is not only a seed dollar which grows a profit for the merchant but is actually retained by him even after he has paid it to the publisher.

Advertising creates a good will worth the cost of the publicity.

It actually costs nothing. While it uses funds it does not use them up. It helps the founder of a business to grow rich and at the same time keeps his business from not dying when he does.

It eliminates the personal equation. It perpetuates confidence in the store and makes it possible for a merchant to withdraw from business without having the profits of the business withdrawn from him. It changes a name to an institution—an institution that will survive after the death of its builder.

It is really an insurance policy which costs nothing—pays a premium each year instead of calling for one, and renders it possible to change the entire personnel of a business without disturbing its prosperity.

Advertising renders the business stronger than the man—independent of his presence. It permanentizes systems of merchandising, the track of which is left for others to follow.

A business which is not advertised must rely upon the personality of its proprietor, and personality in business is a decreasing factor. The public does not want to know the man who owns the store—it isn't interested in him, but in his goods. When an unadvertised business is sold it is only worth as much as its stock of goods and fixtures. There is no good will to be paid for—it does not exist—it has not been created. The name over the door means nothing except to the limited stream of people from the immediate neighborhood, any of whom could tell you more about some store ten miles away which has regularly delivered its shop news to their breakfast tables.

It is as shortsighted for a man to build a business which dies with his death or ceases with his inaction as it is unfair for him not to provide for the continuance of its income to his family.
